

EntraWorld — Growth Partnership Brief

Working Together with EmberTribe (Marketing Partner)

1. Purpose + What “Winning” Looks Like (Together)

Why this brief exists: This is our shared playbook for launching and scaling EntraWorld’s go-to-market with EmberTribe as a true growth partner. It clarifies what we’ll build, who owns what, how we’ll collaborate, and how we’ll measure progress—so we can move quickly, stay aligned, and compound results. This is designed to be a living, working document (not a shelf document).

North Star (first 90 days): In our 90-day agreement, we’re rallying around a clear outcome: **10,000 new leads** and **1,000 paid members**. EmberTribe will build and operate the repeatable growth system (brand + demand + conversion + lifecycle) using the approved stack, with performance tracked in GoHighLevel so we can learn fast and scale what works.

Stretch goals (next scope, once the engine is proven): If we extend the engagement and early data supports scaling, we’ll shift from proving traction to accelerating it—targeting **1,000 paid members within 3 months** and **3,000 paid members within 6 months**, supported by expanded distribution, stronger lifecycle conversion, and partner-driven growth.

Note: These are “next-scope” targets (not commitments inside the current 90-day agreement). Our long-term ambition is bold: grow to **5,000 paying members by the end of 2026**, then **scale 10X in 2027** toward **100,000 active paid members by year-end 2027**, and build the foundation to reach **1M+ paid members in 2028**. We’ll pursue this through disciplined testing, clean measurement, and a shared focus on sustainable revenue growth.

2. How We’ll Win (Roles, Ownership, and Scope)

EmberTribe leads and owns: (1) go-to-market planning and execution; (2) campaign strategy and creative; (3) content and social programming; (4) webinar programming; (5) lead capture, nurture, and pipeline operations inside GoHighLevel; (6) partner co-marketing coordination; (7) inbound/outbound conversation workflows via SalesCloser AI; and (8) performance reporting and ongoing optimization—so we’re always improving results week over week.

Out of scope for EmberTribe (unless added later): core product engineering, legal/compliance decisions, investor compliance/solicitation approvals, and customer support operations. To move fast together, EmberTribe will need timely access to product demos, brand assets, pricing updates, and an approved set of claims/CTAs, plus a weekly stakeholder touchpoint for approvals and prioritization. We're excited to work closely with you during the proof-of-concept launch and build momentum from day one. EntraWorld will continue to build and provide new concepts, creative ideas, video and graphical media assets, as well as campaign ideas, vision and strategy. We seek your professional guidance, expertise, and creative processes to augment our mission.

3. What We're Building and Marketing (Quick Product Overview)

EntraWorld is an AI-powered entrepreneurship platform designed to help people turn ideas into real businesses—faster and with more confidence—in one place: **AI business tools**, a **collaborative community**, and pathways to **capital, partnerships, and services**. Our marketing should spotlight fast, tangible wins (idea → plan → pitch → launch) and the simplicity of not having to stitch together a stack of disconnected tools.

Value pillars: (1) **Build** with AI (plans, decks, research, projections, legal docs); (2) **Connect** through Inner Circle groups, meetings, and mentors; (3) **Fund & grow** through approved investor access pathways, resources, and a services marketplace.

4. What We'll Take to Market (Offer Modules)

- **AI Business Tools:** Business plan, pitch deck, market research, financial projections, contracts, patents, trademarks, and the entraPath roadmap—so founders can go from idea to execution with speed.
- **Community & Networking:** Inner Circle groups, micro-networking events, collaboration, and mentor access—turning momentum into accountability and progress.
- **Investor Access:** Pitch preparation, investor matchmaking, and private placement pathways (all claims must be approved by EntraWorld leadership/legal).
- **Resource Library & Education:** Templates, guides, startup playbooks, and learning resources that help founders make smart decisions and execute confidently.

- **Marketplace & Team Building:** Find collaborators and service providers—and enable providers to offer services—so founders can build teams and ship faster.
- **Youth Entrepreneurship Center:** Student-focused tools, mentorship, and program partnerships that help young innovators learn by building.
- **Meetings & Scheduling:** Integrated scheduling (Google/Outlook), reminders, and custom meeting links to keep collaboration simple and consistent.

5. The Growth & Marketing Stack (Single Source of Truth)

EmberTribe will run and maintain the marketing execution stack, with **GoHighLevel as the system of record** for contacts, pipelines, automation, attribution, and reporting. Our shared commitment: every campaign has clean tracking so we can confidently follow a lead from first click to activation and conversion—and scale revenue with what the data proves.

Tools (integrated into GoHighLevel): WebinarKit (webinars/workshops + event funnels), Clustermagic (content strategy + clustering/repurposing), Canva (creative production), Zeely/Adaptify/AmpiFire (social creation/distribution), and SalesCloser AI (live video AI agent for inbound/outbound conversations and qualification). EmberTribe will keep naming conventions, tagging, pipelines, and dashboards consistent across the stack so we can operate efficiently and improve performance at speed.

6. Offers, Pricing, and How We'll Drive Conversion

Current offers (for messaging and funnels): Starter (Free), Premium (\\$9.95/mo or \\$99/yr), and Family (\\$19.95/mo; up to 5 seats + Youth Center access). EmberTribe will translate this into a simple, compelling value ladder with clear onboarding journeys and smart, timely upgrade prompts.

Conversion responsibilities (EmberTribe): Build and optimize funnels and lifecycle sequences in GoHighLevel for Free → Premium, Premium annual upgrades, and Family adoption; continuously test (landing pages, webinar CTAs, email/SMS sequences, and SalesCloser AI handoffs); and report conversion rates by segment and channel so we always know what's creating revenue—and what to improve next.

7. Positioning + Responsible Claims (How We Talk About It)

Primary positioning: EntraWorld is the all-in-one place where entrepreneurs **build** with AI, **connect** with community and mentors, and **access** pathways to capital and services—without juggling multiple platforms. The promise is simple: faster progress, clearer next steps, and real outputs founders can use immediately.

- **Proof points to emphasize:** speed to outcomes (minutes to first deliverable), breadth of AI tools, integrated community + meetings, scalable plans (Solo → Team → Family), and guided roadmaps (entraPath) that help users keep moving forward.
- **Claim guardrails:** Any statements about funding, investor access, returns, or private placements must be pre-approved; avoid guarantees; use outcome-based language (“helps you,” “supports,” “streamlines”). Clear, compliant messaging protects the brand and enables sustainable scale.

8. Stakeholders, SMEs, and Approvals (Fast Alignment)

Primary stakeholders: EntraWorld leadership sets brand direction, shares product priorities, confirms pricing/offer updates, and approves campaign claims. EmberTribe translates that direction into high-velocity execution and measurable growth—keeping everyone aligned through clear reporting.

Approval workflow (recommended): (1) Weekly priorities + KPI review; (2) 48-hour turnaround for creative/landing page approvals; (3) a pre-approved list for investor/fundraising language; (4) monthly roadmap alignment for upcoming features and launches. This cadence keeps us moving quickly while protecting quality and compliance.

SME access EmberTribe will need: quick product walkthroughs of the key AI tools (business plan, pitch deck, market research, entraPath), community features (Inner Circle), investor workflows (as approved), and Youth Center use cases—so demos and messaging stay accurate, inspiring, and conversion-ready.

9. Our Audience (Who We Serve First)

- **Primary:** Aspiring entrepreneurs/solo founders (0→1), side-hustlers, and early-stage startups who want speed, structure, and affordable guidance to launch.

- **Secondary:** Students/youth innovators (via schools/programs), service providers (marketplace supply), mentors/advisors (trust + outcomes), and angels/seed investors (participation + events).
- **Implication for EmberTribe:** Every campaign will clearly state the target segment, the primary “job to be done,” and the conversion action (signup, webinar registration, upgrade, booking, partner pilot)—so we can execute with focus and scale with confidence.

10. GTM Phases + Channel Playbooks (Build Momentum → Scale)

10.1 Phases (Pre-launch → Launch → Scale)

- **Pre-launch (weeks 1–4):** build awareness, validate messaging, capture leads early, and establish a consistent webinar + content cadence that compounds.
- **Launch + convert (weeks 1–13):** turn leads and waitlist signups into activated accounts, drive “first deliverable” completion, and convert to paid—creating real revenue momentum against our 90-day targets.
- **Optimize + scale (weeks 5–13):** double down on what’s working, expand partner distribution, and strengthen lifecycle conversion so we hit **10,000 new leads** and **1,000 paid members** inside the 90-day scope—and set up the engine for 10X growth.

10.2 Content & SEO (Clustermagic) — Build Compounding Growth

- Maintain a weekly publishing cadence mapped to the founder journey (idea, validation, plan, pitch, launch, growth) so audiences know what to expect and keep coming back.
- Use Clustermagic to create pillar pages and supporting clusters; repurpose each pillar into social, webinar themes, and email sequences to multiply reach without multiplying effort.
- Prioritize demo-led content that shows the AI tools producing real outputs (plan, pitch deck, market research, entraPath roadmap) so prospects can instantly see the value.

10.3 Social (Canva + Zeely/Adaptify/AmpiFire) — Create, Post, Learn, Repeat

- Create a repeatable creative system in Canva (templates for reels/shorts, carousels, ads, webinar promos, and product demos) to increase quality and speed.
- Schedule, distribute, and iterate using Zeely/Adaptify/AmpiFire; ensure every post maps to a tracked CTA and segment so we can scale winners confidently.
- Run ongoing tests on hooks, offers, and demos; feed learnings back into Clustermagic content priorities and WebinarKit topics so every week gets stronger.

10.4 Webinars & Live Events (WebinarKit) — Our Conversion Bridge

- Operate an ongoing webinar program (educational workshops + product demos + partner sessions) using WebinarKit to drive trust, value, and conversions.
- Connect registration, reminders, attendance, and replays into GoHighLevel for follow-up, segmentation, and measurable conversion lift.
- Use webinars as the primary conversion bridge for new users: “attend → build your first deliverable → activate → upgrade.”

10.5 Inbound/Outbound Conversations (SalesCloser AI) — Respond to High-Intent Leads Fast

- Deploy SalesCloser AI as a live video AI agent for high-intent inbound and outbound conversations (webinar attendees, trial activations, partner leads, and enterprise/education pilots as applicable).
- Define qualification scripts, routing rules, and escalation paths; log notes and outcomes to GoHighLevel pipelines so we keep improving the handoff and close the loop.
- Use SalesCloser AI to reduce time-to-first-conversation and increase activation/upgrade rates while keeping messaging consistent and on-brand.

10.6 GoHighLevel (CRM, Automation, Attribution) — Keep It Clean, Measurable, Scalable

- Maintain consistent data hygiene: naming conventions, tags, custom fields, and source attribution—so reporting stays trustworthy and decisions stay fast.

- Build automation for: waitlist nurture, webinar follow-up, onboarding nudges, upgrade prompts, win-back, and partner referral flows—creating a lifecycle that grows revenue while reducing manual work.
- Maintain dashboards and weekly reporting on acquisition, activation, conversion, retention signals, and ROI by channel/segment so we can scale what's working and fix what isn't.

11. KPIs + Reporting (How We'll Track Progress and Scale)

Main outcomes for this 90-day scope: 10,000 new leads and 1,000 paid members—with clear pacing so we can course-correct early and accelerate what's working.

- **Lead generation (top-line):** new leads captured (total + by source), lead-to-MQL rate (if used), and cost per lead (blended and by channel).
- **Activation:** % completing first deliverable (plan/pitch/research/entraPath), time to first value, profile completion, group join rate.
- **Paid members (top-line conversion):** paid members added, Free → Premium conversion, Premium annual conversion, Family adoption, and trial-to-paid conversion (if applicable).
- **Retention:** weekly/monthly active users, repeat tool usage, community engagement, churn rate (paid).
- **Revenue efficiency:** CAC, payback period, LTV (as available), and ROI by channel.

Reporting cadence: EmberTribe will send a weekly KPI snapshot (GoHighLevel dashboard + short insights), run a monthly channel review (what we scaled, what we stopped, what we changed), and deliver a 90-day wrap-up with recommendations for the next scope based on performance versus the **10,000-lead** and **1,000-paid-member** targets.

12. How We'll Work (Cadence, Governance, Deliverables)

- **Weekly:** campaign calendar, content/social schedule, webinar schedule, KPI snapshot, and a shared backlog of experiments.
- **Monthly:** channel performance review, creative learnings, funnel conversion review, and a clear next-month plan we both feel good about.

- **Quarterly (if/when the engagement extends):** positioning/messaging refresh, partner strategy review, and an updated growth plan for the next scope based on what we learned together.

Operating rhythm: We'll run one weekly working session (priorities, blockers, approvals), plus async reviews for creative and copy. EmberTribe will maintain a single source of truth in GoHighLevel for campaign status, assets, and performance notes so we stay aligned and keep momentum.

13. Shared Scorecard (What We're Driving Together)

Together, we're building a scalable growth engine that moves people from awareness → lead → account creation → first deliverable → community engagement → paid conversion. EmberTribe will operate this using the approved stack (WebinarKit, Clustermagic, Canva, Zeely/Adaptify/AmpiFire, SalesCloser AI) fully integrated into GoHighLevel, while EntraWorld provides direction, approvals, and product/brand inputs that keep execution fast and accurate. We'll define success in this 90-day scope by hitting **10,000 new leads** and **1,000 paid members**, supported by strong activation, conversion, and retention signals that set us up to scale 10X year over year.

13.1 Scorecard Objectives

1. **90-day targets (North Star for this agreement):** Generate **10,000 new leads** and convert **1,000 paid members** within 90 days; share weekly pacing vs. plan in GoHighLevel so we can celebrate wins and adjust quickly.
1. **Brand awareness:** Increase share of voice and recognition for "AI entrepreneurship platform" positioning.
2. **Message-market fit:** Validate segment-specific hooks and offers; document winning messages and creatives.
3. **Waitlist and lead capture:** Grow owned audiences (email/SMS) and event registrations with clean attribution in GoHighLevel.
4. **Webinar attendance & conversion:** Operate WebinarKit programming that reliably converts attendees into activated accounts.
5. **Activation:** Increase first-deliverable completion rate and reduce time-to-first-value.

6. **Paid conversion:** Improve Free → Premium and Premium annual conversion with tested funnels and offers.
7. **Family plan adoption:** Create a repeatable path for households and youth entrepreneurs to adopt Family.
8. **Social growth & distribution:** Scale organic + paid social using Canva + Zeely/Adaptify/AmpiFire with clear CTAs.
9. **Content & SEO growth:** Build compounding traffic and authority using Clustermagic-driven content clusters.
10. **Partner-driven acquisition:** Launch and track co-marketing and referral flows with partners (incubators, programs, creators).
11. **SalesCloser AI impact:** Increase qualification and conversion via SalesCloser AI workflows logged in GoHighLevel.
12. **Operational excellence:** Maintain data hygiene, attribution, dashboards, and a consistent experimentation cadence.

13.2 Execution Checklist (How You'll Run This Week-to-Week)

- **Plan:** Keep a rolling 90-day GTM plan plus a weekly sprint board (campaigns, content, webinars, experiments).
 - **Create:** Build content with Clustermagic guidance; build creative in Canva; distribute via Zeely/Adaptify/AmpiFire.
 - **Convert:** Run WebinarKit funnels and connect everything to GoHighLevel nurture + pipeline stages.
 - **Talk:** Use SalesCloser AI for high-intent inbound/outbound conversations with clear routing/escalation.
 - **Track:** Keep GoHighLevel tagging + source attribution tight; report weekly and optimize monthly.
 - **Partner:** Maintain a partner calendar; run co-marketing webinars and referral tracking in GoHighLevel.
 - **Optimize:** Run a documented experimentation cadence across messaging, landing pages, webinars, social creative, and lifecycle sequences.
- Additional Growth Opportunities (Next Experiments)**
- Podcasts (guest spots + owned show) to build authority and drive evergreen lead flow

- Live events (workshops, partner pop-ups, and community meetups) to create high-trust conversions
- Apple / Google Play Store advertising to increase app discovery and drive qualified installs
- TikTok / Snapchat / gaming apps (creative-first experiments) to expand reach and lower cost per lead
- New channel and partner ideas from EmberTribe (added to the experiment backlog and prioritized by impact)

Conclusion (Our Shared Commitment)

Bottom line: over the next 90 days, we're partnering to run a clean, measurable growth engine—generate **10,000 new leads**, convert **1,000 paid members**, and document what's working so we can scale it. We'll keep everything flowing through GoHighLevel (tracking, tagging, pipelines, automation, and reporting), execute a steady weekly cadence across content, social, webinars, and SalesCloser AI conversations, and surface learnings quickly so we can iterate with confidence. At the end of the 90 days, we'll recap results, highlight the winning channels and messages, and align on the next scope to accelerate revenue and pursue 10X annual growth—together.
