

Matt/Melisa - April 20

[VIEW RECORDING - 28 mins \(No highlights\)](#)

[@0:00](#) - **Melissa Ceden**o (EmberTribe)

Hey, Matt. How's it going?

[@0:02](#) - **Matt Weisensee** (wisenweb.com)

Pretty good. I told you we'd take this across the finish line.

[@0:07](#) - **Melissa Ceden**o (EmberTribe)

Good job. Thank you.

[@0:09](#) - **Matt Weisensee** (wisenweb.com)

I appreciate it. You did a great job, too. Hey, I tried to be very thorough and send a lot of stuff over the last two days to show Larry how complex this is.

It's not just like we're going to make a couple videos and hope some people convert. Yeah. Because, you know, he's been around the block and he remembers the way that things used to be done, you know, and you can even see by his own document that he sent you.

It's so simple that he didn't even spell check it. And I just like, you know, let him do what he wants to do because he's the boss.

But I have arguments with him, just so you know, I don't I'm not a yes man. I don't I don't don't

And I said, look, Larry, what are we wasting all of our time for if we're not going to just, you know, do this right?

We didn't spend a year building this for nothing. And I think right now the timing's right. Everybody's looking at it.

You know, I don't know if you know the story, but when we were in the telemedicine industry, we were pioneers of it.

We were too early. We sold the company before COVID. We're like, what? Like, right at the cusp of it.

Three months before.

[@1:32](#) - **Melissa Ceden**o (EmberTribe)

That's crazy.

[@1:33](#) - **Matt Weisensee** (wissenweb.com)

Yeah. And so, you know, it was still a \$15 million transaction.

[@1:39](#) - **Melissa Ceden**o (EmberTribe)

Yeah, but.

[@1:40](#) - **Matt Weisensee** (wissenweb.com)

It would have been \$150 million a month later, two, three months later. So, anyway. And I think that's one of the reasons why I came out of retirement, too.

[@1:50](#) - **Melissa Ceden**o (EmberTribe)

He's like, I need a big one. Yeah.

[@1:53](#) - **Matt Weisensee** (wissenweb.com)

And I was watching, I was watching the Landman final episode. Last night. Thank Billy Bob Thornton.

[@2:01](#) - **Melissa Ceden**o (EmberTribe)

Have you seen the show? No, I haven't. Right now I'm watching The Madison. I heard that's okay. No, I mean, it depends on what you want.

I like Taylor, whatever his last name is, Sheridan. I really like Yellowstone. The Madison is different, though. a very different feel.

[@2:24](#) - **Matt Weisensee** (wissenweb.com)

Oh, okay. Well, it's the same writer. It's got Billy Bob Thornton, tough guy. Anyway, but he walks away from a VP of Chevron job at the very end.

[@2:37](#) - **Melissa Cedeno (EmberTribe)**

Oh, I don't want to tell you. Don't tell me because I'm going to have to watch it next.

[@2:40](#) - **Matt Weisensee (wisenweb.com)**

Oh, sure. I already ruined it for you. But one line he says is, he's like, why? He's like, because I think I got one home run left in me.

And that's the comment I think Larry feels like.

[@2:54](#) - **Melissa Cedeno (EmberTribe)**

Yeah. Yeah. I mean, you know, they all, I think all big hitters want to do that. That's why.

[@3:00](#) - **Matt Weisensee (wisenweb.com)**

You have a Tom Brady who went to the Patriots, you know what I mean, like, they all, they all want to do that and left him with the Tampa and yeah, so in the first few days I'm sure it's just going to be organizing thoughts and, you know, looking at where we're at, analyzing our documents and Alexa, stop.

Sorry, that was my reminder to get on the phone with you. I guess I originally said one, you know, 10 minutes, I thought it was gonna be 120, but I remembered.

[@3:34](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@3:36](#) - **Matt Weisensee (wisenweb.com)**

Yeah, and I started looking through all the systems, got a feel for them, registered with them all, set up general information, like, you know, tax ID and put a logo in there.

But then it started asking me to go through and create funnels and I'm like, no.

[@3:53](#) - **Melissa Cedeno (EmberTribe)**

No, don't do that. There's no need for you to do that.

[@3:56](#) - **Matt Weisensee (wisenweb.com)**

Yeah, and I just wanted to see how it worked though.

[@3:58](#) - **Melissa Cedenno (EmberTribe)**

Yeah, I just clicked.

[@4:00](#) - **Matt Weisensee (wisenweb.com)**

Create a presentation, and you can use their software, or you can just build your own, you can use AI, whatever, and then you upload it, and it just builds the webinar for you, and then you can insert your little video window, kind of like you can do in PowerPoint now, too, you can just insert your speaker view, and then you can record it, and then you turn on the bot, and it will listen to the questions and answer people during the call.

[@4:30](#) - **Melissa Cedenno (EmberTribe)**

Okay, good. Be honest.

[@4:32](#) - **Matt Weisensee (wisenweb.com)**

You don't have to field the stuff. And then the other part is the sales closer. I told the guys, I said, look, we're on a, you know, month to month on this.

We haven't had time to implement it yet. It's fairly complex to get the bot to say exactly what you want.

I mean, it's like programming a human.

[@4:51](#) - **Melissa Cedenno (EmberTribe)**

Yeah.

[@4:52](#) - **Matt Weisensee (wisenweb.com)**

It's like, you know, I had to scrape everything we knew about, you know, AI and entrepreneurship. You Great. that.

welcome. I did one for Babson. That's how I created that quick Babson video. But I was going to use that video to create a knowledge base.

I told you the billionaire called me on Friday. He asked me to send him some stuff, which I have a call with Larry and Aula today right after this call.

Okay. I'm going to tell him, look, I'm going to use this tool on Dean. I'm going say, Dean, this is just an example of the technology.

And we're trying to impress them with our expertise and use how we can implement AI and how we can show kids that they can use these similar tools and follow this structured roadmap that we created called Entropath.

It's not like, Hey, go, go get them tiger. Use AI. That's what people are doing now. Like, go ahead and just use this.

You know, like, wait a second. The average person doesn't know where a problem.

@5:59 - Melissa Cedeno (EmberTribe)

it's like

@6:00 - Matt Weisensee (wissenweb.com)

They don't know what an agent is, that's the whole point. We're trying to simplify it for them, and so I talked to Larry a little bit over the weekend, and I said, look, I said, I need to have your approval to what I'm going to send, because I'm going to tell them we can do this, that, and the other, and then we're going to try to market them for a test campaign.

It's a good one, because if they say no, I still have Dean to fall back on to be an investor, and to maybe, I said this to Dean on the phone, this is bigger than Babson.

This is not just you guys. Think about this as you owning the whole platform and selling it to every university, college, high school, junior high, elementary kid in the world.

And then he went like, let's talk, Matt. He knows the market size there.

[@6:51](#) - **Melissa Cedeno (EmberTribe)**

Yeah, of course, of course.

[@6:53](#) - Matt Weisensee (wissenweb.com)

And once we build this template for Babson, we just change the name. Same. And it's going to be Harvard start, Stanford start, and we're to do it over, and over, and over, and over, and over, and and over, again to every school in the world.

[@7:09](#) - **Melissa Cedeno (EmberTribe)**

You know, so we built a portal for a client called BrainEye, and they are an app that does, it's really cool.

No, so it's for athletes to see if they've gotten a concussion. So, like, the phone will scan your eye, and it can tell if it's showing any indicators that you do have a concussion, so that then you know, like, okay, I should go to the doctor, I should go get it checked out, you know.

Anyway, it's really cool. So we built a portal for them because what they offer is to the soccer leagues, like in Australia, in Spain, like Real Madrid, to be able to offer that app to their players.

So the portal, I don't have to get the details because it wasn't my client, but... Our CEO was spearheading it, and when Real Madrid logged into the portal, let's say, they would see all of their branding, but it had all of the same substance, regardless of whatever it was, or it was tailored to whatever, you know, a Real Madrid or the other soccer club like that.

And so in essence, like, and that was like a year ago. So with the advancements of technology and AI and all of that, doing something that could feel very branded to each college, each school, or each whatever, is going to be so much easier now than it was even a year ago.

[@8:37](#) - **Matt Weisensee (wisensee.com)**

Yeah, we used to white label Entra Health to every hospital, every health facility, every medical device provider. So we had, you know, a quick, easy, we would just build the instance for them.

We didn't go, and then when we got acquired by CRF in our transition, they created a self-service portal where you'd upload your own stuff.

We would just, you know, swap out logos and colors and then send them a login instruction.

[@9:07](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@9:08](#) - **Matt Weisensee (wisensee.com)**

So I thought you're going with that conversation is that what you built there could translate, transfer down to every Little League team in the world too.

[@9:19](#) - **Melissa Cedeno (EmberTribe)**

You know how many, there's like a hundred million of them. But yeah, but that's kind of where I was going at, you know, like in essence, like everything, yeah, yeah, yeah.

Where everything can be like interchangeable with just a switch, you know, and it could be very personal.

[@9:35](#) - **Matt Weisensee (wisenweb.com)**

Yeah. So this morning, I like to do prospecting while I'm still in bed. I wake up, you before I even have my coffee, my eyes have to adjust for five minutes.

And I saw somebody pop up. It was a woman that I met at a alumni event at San Diego State years ago.

And since then, San Diego State has got a lot of endowment. I don't know if you knew, they built a whole new campus.

They bought the stadium. built the Charger Stadium and ripped it down and built a new Aztec Stadium, and they created SDSU West, and they built a gigantic innovation center, and they launched something called the Zip Launchpad two years ago, and it's now just becoming, and they have virtual pitches and whatnot, and it's a lot of similar things that we're doing, but they're just doing it for their own students in a small, you know, localized level.

[@10:26](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@10:26](#) - **Matt Weisensee (wisenweb.com)**

so I sent out an email to the head of the Launchpad. didn't get any response, but she likes some of my posts here and there.

Mary, whatever her name is, I forgot. And then, so I just, I contacted the dean of the business school, and he reached out, and he texted me.

And I said, go Aztecs, I'm an alumnus, you know, so. And I said, yeah, we're launching an AI platform today.

And I'm, you know, a member of your alumni, you know. and I used to be on the President's Leadership Fund.

I used to donate when I was a partner. I for the Gallup organization, so I used to sit there with President Day in the sports, you know, in the skybox, talking about strategy.

Ten years ago, I said, I'm well-equipped to do this, and then I said, okay, let's talk. So if we get one or two schools interested, the rest of them we're going to want to jump on, too.

And so I want to market the hell out of San Diego State, because Paula's based in San Diego. I'm an alumnus.

Larry, you know, lives in Southern California, and he knows how innovative San Diego State is. mean, it's the Stanford of Southern California.

It's super, you know, business school, nursing school, you know, all kinds of really, you know, I would say, useful degrees that are like can be, you know, you know, not a bunch of abstract theory, and they don't have a psychology and law.

They have a, you know, what would be industrial psychology for business, you know, that kind of really, really specific things.

Like if you want to build a tool for hiring people, they have degrees for that kind of stuff. Anyway, point is, they have this very innovative approach, and we want to reapply for the grant for SBIR for education and get some of the money that they've reallocated from the Department of Education.

It's in the tune of like \$500 billion.

[@12:42](#) - **Melissa Cedeno (EmberTribe)**

Wow.

[@12:43](#) - **Matt Weisensee (wissenweb.com)**

Lots of money.

[@12:44](#) - **Melissa Cedeno (EmberTribe)**

And Melania Trump is running the thing. you told me.

[@12:47](#) - **Matt Weisensee (wissenweb.com)**

Yeah. And so, if we have a university that partners with us, which I thought would be great, because I'm in LAS Tech, I would like take personal, you know, time to go out there and, and I know.

Thank you. You know, the workings of the school and whatnot, but when we talk about these little side things, I want to use them as templates and also pilot practice runs for the future, because we're not going to fail.

You know, it's not a life changer to just not win Babson or San Diego State. That's one tenth of one hundredth of a percent.

[@13:25](#) - **Melissa Cedeno (EmberTribe)**

Yeah, of course. Yeah. Yeah.

[@13:28](#) - **Matt Weisensee (wissenweb.com)**

Yeah. But but so so I know we only have a couple of minutes. I wanted to tell you that I was putting together those documents.

I got Larry all engaged. He's ready to roll. He's been you know, I know when he sends out lots of messages to me that he's like he's really working hard.

Yeah, I need to have you on board. I didn't want to overwhelm you with all those things that I sent.

But I had to show Larry that this is a long process. And that's why I put a Gantt chart on there is like just setting up.

The CRM.

[@14:01](#) - **Melissa Cedeno (EmberTribe)**

Expectation, yeah, yeah, yeah. Yeah, I know, and we actually have experience with GoHighLevel because, like I told you, we just transferred over to GHL.

[@14:12](#) - **Matt Weisensee (wissenweb.com)**

That's the reasons why we selected you too.

[@14:14](#) - **Melissa Cedeno (EmberTribe)**

Yeah, We don't have to learn how to use it again. No, no, we know it, and our developers know it because they helped us put it all together in the back end too.

[@14:23](#) - **Matt Weisensee (wissenweb.com)**

So that is going to be easy Yeah, so the first four things that we want done is just set up HighLevel, integrate the, they call it the lead connector.

[@14:35](#) - **Melissa Cedeno (EmberTribe)**

It's one of their apps, they own it. Yeah.

[@14:37](#) - **Matt Weisensee (wissenweb.com)**

To the Webinar Kit into the sales closer. They already have some wizards already, I look. Yeah. mean, you don't even have to do anything.

You just click on it, but just set it up, make sure it works, test the data, you know, back and forth.

And then, and then we'll create a funnel to practice on internally. And then we'll give you a couple ideas like, you know, Babson starts obviously the first Let

We want to just bombard Babson right off the bat as the practice, because we're already in it. I mean, this is a real, and it's a monster, because when I was talking to Dean, I didn't tell you this, I like, I said, so yeah, we're, you know, we're also, he goes, well, you know, what else you looking for?

And I purposefully did not ask for money, because his buddy who plays tennis with says, he likes to come up with the offer.

He doesn't want anyone pitching him. As soon as you come chasing him, he gets cold.

[@15:35](#) - **Melissa Ceden**o (EmberTribe)

I'm sure he gets a lot of requests.

[@15:37](#) - **Matt Weisensee** (wissenweb.com)

look, we don't need any money. And even when we told Babson, Larry self-funded this. Obviously, he's got wherewithal. He's not just, he doesn't even need an angel, but he wants one, because everyone wants to spend someone else's money.

We're stupid. And we want to scale 10 times faster. Yeah. If you inject a hundred, and think about this too, Melissa, if we get this money.

Bye. Bye. And this deal, half of it's gonna go to EmberTribe, advertising, scaling, because you guys are gonna grow with us.

It could be a unicorn. And I mean, the more I ask people, the worst thing about it, just so you know, is the platform itself is not ready.

[@16:19](#) - **Melissa Ceden**o (EmberTribe)

Yeah.

[@16:20](#) - **Matt Weisensee** (wissenweb.com)

Ideas and the concepts and everything are there, but it's like a straw man right now.

[@16:25](#) - **Melissa Ceden**o (EmberTribe)

Yeah, I was gonna, you know, that's like my next conversation. I do have to go like in three minutes, but my next conversation with you is we've got to do something.

I mean, you guys, whatever, I don't care who does it, but something has to be done, I think, about the actual platform.

So like when you're logging in, all of that, because that does not, like the website is going to look very different than the platform once we're done.

ACTION ITEM: Review Matt's docs/setup; send website example to Larry; present to Larry on Wed - [WATCH](#)

And so, I think that, I don't know, I didn't want to step on toes either, like obviously, so I didn't know, like we did it anywhere.

[@16:56](#) - **Matt Weisensee (wisenweb.com)**

That's what you need to do. What you need to do is show an exam. Yeah. Be of what the website's going to be really quickly, like this is where we're going, and be very firm and go, look, Larry, this is our, based on professional experience, this is, we're experts in this, you can like whatever you want, it doesn't really matter, it's like believing your own press releases, it doesn't matter, what we are going to do is build something that is tangible and sellable, and you can convert from it, you can make money from it, and you're going to have have to, listen, I've been screaming about the homepage, the tools and all that stuff can easily be changed, the menus and all that, once you're in the system, but the first experience, it's the first impression, you only get one, when you log in, the little, I mean, even the, the, the, the, the, the robotic voiceover and the spinning globe, I'm like, that was all, all doesn't have any creative juice in him, he's more of just a programmer, he does whatever, all us, Larry says,

And Larry is a long-term thinker and he's got good ideas, but he doesn't have up-to-date skill and doesn't understand marketing and what works.

He's just like, yeah, let's build something that does this.

[@18:13](#) - **Melissa Cedeno (EmberTribe)**

He's more of an inventor. He's a visionary.

[@18:16](#) - **Matt Weisensee (wisenweb.com)**

Yeah, yeah. And then I'm kind of the practical one that has done everything in between. And I tell them very straight because I don't really need this job.

I just told them, I said, look, I'd rather be skiing right now in Bariloche in Chile, you know, because the season's starting down there.

And I said, I want to finish my book and then sign people up all over the world while I'm traveling, financial world.

That's why I picked you guys, Melissa. So you could do all of the stuff that, I mean, Larry made a comment like when I set that little chart yesterday.

Oh, these are the things we need to do for LinkedIn alone. Oh, you didn't see that. And I. And I made a checklist and I put it online and he's like, are those all the things that we're going to get EmberTribe to do or can you do them?

I'm like, Larry, this is a guide for someone so they understand how complex it is. And if you follow all the steps, maybe a month later, you can probably achieve some of these goals.

But I'm just trying to represent how complex this is. This is just one of a hundred things.

[@19:26](#) - **Melissa Cedeno (EmberTribe)**

Yeah, yeah, yeah.

[@19:27](#) - **Matt Weisensee (wisenweb.com)**

And it has to be done right. You have to set up the account right and the profile has to be right.

Yeah. And it's so and he's like going on and signing up for Facebook thinking that's the way the social media market.

[@19:39](#) - **Melissa Cedeno (EmberTribe)**

Oh, gosh. No. OK. Yeah. So, yeah, we have to. So, I mean, I don't know where you're at with access and all of that, but definitely I'm like trying to think through what's the best.

You know how to sign up, recreate all of the signups for us the way we need to, because, OK.

[@20:00](#) - **Matt Weisensee (wisenweb.com)**

I already got a couple, like I all search on LinkedIn and he's got Enter World associated with his account and I originally set one up underneath my account, but I only posted two things, the last video just so there was something there and a website link with a logo.

And I purposely didn't post anything because I didn't want anybody going there yet. I want to have a pre-launch, not a launch.

I told him this, we need to build up momentum. You know, it's like, you know, as an author, you have to build a rising action.

You can create an arc, you tell a story, you want people to, you know, you know, wait for it.

And, and then, you know, explode with a big video and a reveal and drop something to them. Not just like, oh yeah, we're some really cool guys and we want you to join.

No.

ACTION ITEM: Create access@entroworld.com; add EmberTribe to GHL/WebinarKit/Sales Closer; share creds; disable old logins - [WATCH](#)

[@20:50](#) - **Melissa Cedeno (EmberTribe)**

I would say that, okay, then we'll have to, let me review everything that you've sent, everything that you've set up and all that because the, the access and all that.

That's going to be really important, but again, we, I think what you should do is set up a Gmail account, Matt, that is like, like we have access at EmberTribe, right?

So set up like access at whatever, entroworld.com or whatever, and that's the, that's the, the email that we'll use to create login, logins, so that authentication codes, all of that is going to that email, you have access.

You want to, you want to sales or marketing at, at, whatever, whatever, whatever it is. It's more, it's not going to be public facing.

It's just to set up logins and set up like one central space for logins so that we're not having to ask you to send it to your email and say, hey, did you get a code?

[@21:43](#) - **Matt Weisensee (wissenweb.com)**

ET at entroworld.com.

[@21:45](#) - **Melissa Cedeno (EmberTribe)**

I would, I would do, I would do access at, at entroworld.com because that then access at entroworld.com because that's the login that that's the email that you know that you're going to create all the logins with and that's going to be an easier way to keep up.

[@21:58](#) - **Matt Weisensee (wissenweb.com)**

Yeah, and then we'll turn off all of it. The existing ones, except I've been personal, you know, I've got thousands and thousands of contacts and I will, but I'm going to share what you got.

I'm going to just share what you build on my site. Exactly.

[@22:12](#) - **Melissa Cedeno (EmberTribe)**

Exactly. Exactly. So, exactly. So, so yeah, so just, you know, set that up, give us access and then set it up like on a Gmail that, that's going to be the easiest way to, you know, because is Entralworld on Google Workspace?

Uh, it's on network solutions, I think, but just tell us how to log in because we use Google Workspace.

So all of our, at EmberTribe.com emails are actually with Gmail because it's a Google email.

[@22:42](#) - **Matt Weisensee (wissenweb.com)**

It doesn't matter. My personal is there. I can set it up through my personal too.

[@22:46](#) - **Melissa Cedenno (EmberTribe)**

Actually, you know what, do this because you're going to need a Google Workspace for Google email, just Gmail to create Google ad accounts, Google analytics.

[@22:55](#) - **Matt Weisensee (wissenweb.com)**

I already have one, so I'll add one for you.

[@22:59](#) - **Melissa Cedenno (EmberTribe)**

Okay. Okay. Then do that. And then that'll be what we use to get access at whatever, because in that way.

[@23:05](#) - **Matt Weisensee (wissenweb.com)**

problem, no problem.

[@23:07](#) - **Melissa Cedenno (EmberTribe)**

Yeah, that'll be the best way.

[@23:08](#) - **Matt Weisensee (wissenweb.com)**

And you got a one more minute or you have to go?

[@23:10](#) - **Melissa Cedenno (EmberTribe)**

Like, I'm going to start packing, I have to go pick up my kids from school. So I'm to start packing up while you talk.

[@23:15](#) - **Matt Weisensee (wisenweb.com)**

Okay, all right. So the other thing is that I will add you on as the user today for Go High Level.

And then Go High Level said they resell Twilio accounts so they could just turn one on for you. Do you recommend that or?

[@23:35](#) - **Melissa Cedenno (EmberTribe)**

Um, yes, that, that's, that's fine. Um, they're just, there is authentication. So I just want to be careful now.

I'm just speaking like, oh, can you hear me? Can you hear me?

[@23:47](#) - **Matt Weisensee (wisenweb.com)**

Yeah, now I can. Okay.

ACTION ITEM: Add disclaimer/privacy to site; then enable Twilio SMS - [WATCH](#)

[@23:49](#) - **Melissa Cedenno (EmberTribe)**

Okay. Um, I just want to be careful. just speaking very transparently with you. I just want to make sure that like, we'll set up the accounts and all of that, but, um, there's authentication process.

So for Twilio, I think it's like DMARC or something. It's like a federal process that you have to go through.

[@24:07](#) - **Matt Weisensee (wisenweb.com)**

Yeah, I already did the practice with it. They have to also reference your disclaimer and privacy policy on the website.

[@24:16](#) - **Melissa Cedenno (EmberTribe)**

So that has to be added. Exactly.

[@24:18](#) - **Matt Weisensee (wisenweb.com)**

We can wait a week to add Twilio. But I just want to say that that's one of the steps that are in the four points of my pronged setup implementation for CRM.

The other one is just sending you access, I'll just create a user account for you, access, at, for all, one at, one at Sales Closer, one at, and I'm already building, I already got two agents built at Sales Closer.

I'm going to work on that. You just have to like, you know, integrate, click it, and make sure.

[@24:51](#) - **Melissa Cedeno (EmberTribe)**

Which is, which is, we literally have all the experience in that because we have a bunch of automations for our go high level too.

So, like, we also build. And WebinarKit is the same thing.

[@25:02](#) - **Matt Weisensee (wissenweb.com)**

They already have an integration, and they use HighLevel as their own CRM, and I think they have a white-labeled version of it as part of their own solution, so it'll look familiar to you.

And so we're going to be doing these webinars, like, you know, once a week, and then it'll be, you know, probably using avatars eventually.

Maybe we'll, you know, that's why, and I put in that document I sent to you over the weekend, we want you guys to come up with ideas, and we also want to expand into your podcast capabilities.

[@25:35](#) - **Melissa Cedeno (EmberTribe)**

And the strategy and all that, yeah.

[@25:36](#) - **Matt Weisensee (wissenweb.com)**

Yeah, once we see people coming in to the platform, or did you just turn off your camera?

[@25:42](#) - **Melissa Cedeno (EmberTribe)**

I switched over to my phone.

[@25:45](#) - **Matt Weisensee (wissenweb.com)**

Oh, okay, you're leaving? Yeah.

[@25:47](#) - **Melissa Cedeno (EmberTribe)**

Okay. No, no, no, I'm just walking, we're walking.

[@25:51](#) - **Matt Weisensee (wissenweb.com)**

Yeah, so all you got to do is look at the documents.

[@25:54](#) - **Melissa Cedeno (EmberTribe)**

on, give me one second, hold on, let me tell my girls, give me one second. at need. document. All right.

Sorry. You can talk.

[@26:19](#) - **Matt Weisensee (wissenweb.com)**

No problem. Okay. So, yeah. So just look over the two documents. I kind of gave a big picture with expectations.

And then I have like a detailed list of to do's to get the CRM and all the data flowing properly.

That's it. And then, and we're going to work simultaneously with your creative team, your ad team and all that.

[@26:42](#) - **Melissa Cedeno (EmberTribe)**

You're going to meet them all. You're going to meet them all on Wednesday's call.

[@26:46](#) - **Matt Weisensee (wissenweb.com)**

Perfect. All right. Great.

[@26:48](#) - **Melissa Cedeno (EmberTribe)**

you'll, you'll, all of them there.

[@26:50](#) - **Matt Weisensee (wissenweb.com)**

And then I'll, I'll, create the accounts for you and get you the emails and set the expectation for layering.

So on Wednesday, he knows that we've already set this in motion and this is what we need and be firm.

Go, Larry, this is what's required. Don't say, you know, we're going leave it at Lena. You know, say this, this is why you hired us.

We're experts. Okay.

[@27:15](#) - **Melissa Cedeno (EmberTribe)**

So when, yes, I don't have a problem saying all that, but I just want to be careful because the platform, so the, once you log in to actually access the platform, that's not within our scope.

So I just want to make sure that he knows that there's a differentiator.

[@27:29](#) - **Matt Weisensee (wisenweb.com)**

Yeah, no, we're going to, we're going emulate what you build. We'll take your designs and we'll recreate all of that.

So the homepage, see, I've already asked him to build a new landing page in between the log in and questionnaire and all that.

It's got to be more informative and flashy and salesy to transition.

[@27:47](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@27:48](#) - **Matt Weisensee (wisenweb.com)**

Yeah.

[@27:49](#) - **Melissa Cedeno (EmberTribe)**

Okay, good.

[@27:50](#) - **Matt Weisensee (wisenweb.com)**

And then if, and if you want to say something like, look, your, your, your platform is a little bit antiquated, use some really like, like without offending them, but try to use.

[@28:00](#) - **Melissa Cedeno (EmberTribe)**

Yeah, yeah, yeah, yeah. Very professional words that- There's opportunities for- Conversion improvements.

[@28:06](#) - **Matt Weisensee (wissenweb.com)**

Yeah, yeah. And we're going to make some suggestions for you. And I think after you see our web design, you're going to see why.

Yeah. Okay.

[@28:13](#) - **Melissa Cedeno (EmberTribe)**

That makes sense.

[@28:14](#) - **Matt Weisensee (wissenweb.com)**

All right, great.

[@28:14](#) - **Melissa Cedeno (EmberTribe)**

Thanks. Have a good day. All right, Matt. Have a good day. If you do anything, let me know. I will.

I will. Don't worry. I'll call or text or email. All right. Bye-bye. All right. Bye.
