

Matt/Melissa - April 06

[VIEW RECORDING - 52 mins \(No highlights\)](#)

[@0:00](#) - **Matt (wissenweb.com)**

I had to pull over on the side of the road.

[@0:02](#) - **Melissa Ceden0 (EmberTribe)**

I'm here, though. How's going?

[@0:06](#) - **Matt (wissenweb.com)**

Pretty good. How are you doing? How was your weekend?

[@0:09](#) - **Melissa Ceden0 (EmberTribe)**

Good. I'm actually in Miami now because my kids are in break.

[@0:15](#) - **Matt (wissenweb.com)**

Well, I am sorry about your circumstances, but unfortunately. Yeah. Yeah. Go ahead.

[@0:29](#) - **Melissa Ceden0 (EmberTribe)**

No, was just going to say it was kind of timely because we were coming down for spring break. So it was like, but you know, it is what is.

I appreciate it. All right. So I'm sorry. What were you saying?

[@0:45](#) - **Matt (wissenweb.com)**

Oh, nothing that I finished my presentation and I made some little edits to that video that I made. So I'm kind of, I'm kind of go with a 10 page simple.

Introductory presentation on Wednesday morning, they moved it up till 9am. And I'm going to present that video to them just as a, you know, basically an icebreaker.

And then I wanted to talk to them about the goal of the meeting is to the of the of the WebEx is to get a face to face meeting and do a pilot.

So what did you guys come up with as a marketing campaign strategy? Over the weekend. Yeah, so yeah.

[@1:33](#) - **Melissa Ceden**o (EmberTribe)

So I actually have quite a few updates for you. One is that Babson strategy, but also we have some creatives that you will be able to use as well if you'd like.

I have two videos and three static images that I think you're gonna like. And then also a strategy to hyper fixate on a college or school as you were preparing to pitch.

And even. And for a short time afterwards, so that as you've pitched, you're still showing up in their mind, in their feed.

The other thing that I was able to prepare was an updated fully, like updated strategy, more than anything on COM, and a full implementation for your CRM, and then also design and web development for your website, which I know we were going back and forth on and we were asking, so I'll give you more details about that.

But first, let me go ahead and share with you the assets, sorry, I got stuck, the assets for the pitch, so that you can let me know what you think about that.

Sound good?

[@2:46](#) - **Matt (wisenweb.com)**

Yeah, perfect. All right. I have to go to a dentist appointment too. I chipped the tooth. It's no big deal.

SCREEN SHARING: Melissa started screen sharing - [WATCH](#)

[@3:03](#) - **Melissa Ceden**o (EmberTribe)

All right, let's show my screen. Can you see my screen?

[@3:16](#) - **Matt (wisenweb.com)**

Yeah.

[@3:17](#) - **Melissa Ceden**o (EmberTribe)

All right, so the strategy, I'm going to make this bigger for you. The strategy is in essence, you know, so any high value opportunities, right?

You're going to want to make sure that we are running things ahead during the pitch and then afterwards. And so two months before seed enter start creative tip apps on campus and selling zip codes during the pitch.

Decision makers have already seen venture world multiple times across the channels and then you'll need to after maintain presence post-move-in-to-the-unifless-faring decision underway.

If you'd like, this can be truncated to one month before and two weeks after. It just kind of depends on how you're feeling about the pitch under the circumstances of each school that you would be pitching, right?

So six creative angles running simultaneously. You see to shift frequency about fatigue. Channels would be LinkedIn, using Trump and targeting, Meta, using radius targeting, and then CTV with polygon, and she can use the code targeting as well, with the goal being that the decision makers are going to see Entra World before, during, and after, and then be able to replicate this play bug every time you guys are going to have a high-value pitch somewhere.

[@4:23](#) - **Matt (wisenweb.com)**

Did you describe all that in, like, your new updated strategy approach guide?

[@4:31](#) - **Melissa Cedenno (EmberTribe)**

Yeah. Okay, perfect. Do you see my screen?

[@4:35](#) - **Matt (wisenweb.com)**

Yeah.

[@4:36](#) - **Melissa Cedenno (EmberTribe)**

Okay, yeah. So this is that whole updated strategy document.

[@4:41](#) - **Matt (wisenweb.com)**

Okay.

[@4:42](#) - **Melissa Cedenno (EmberTribe)**

It's just that I'm going to the section with the Babson College student financing first.

[@4:46](#) - **Matt (wisenweb.com)**

I'm looking at it on my phone, so I zoomed in on it.

[@4:49](#) - **Melissa Ceden0 (EmberTribe)**

I can see it now. Okay. So here, I'm going to play some of the creatives. Let me know if you're not able to hear the volume.

you. Let's see. Can you hear it? Were you able to hear the video?

[@5:14](#) - **Matt (wisenweb.com)**

I can turn off my video though. Hold on. I'll turn off my mic too. There's a button in Zoom that says share computer audio.

[@5:27](#) - **Melissa Ceden0 (EmberTribe)**

Yeah, let me see. There we go. Okay, let me know now once I play it, okay? Quick question. What's the hardest part about starting a business while you're still in school?

Can you hear it? You're on mute so I can't hear you.

[@6:09](#) - **Matt (wisenweb.com)**

Yes.

[@6:10](#) - **Melissa Ceden0 (EmberTribe)**

Okay. All right, great. The launching part. Like, how do I even validate it? How do I get funding? I've learned the concepts, but it's like, okay, now what?

[@6:25](#) - **Matt (wisenweb.com)**

I have ideas. I just don't know what to do with them after the idea part. There's an AI-powered platform being piloted that lets students actually build, not simulate, build, and access real investors to launch faster.

Oh, yeah. I liked it.

[@6:43](#) - **Melissa Ceden**o (EmberTribe)

The background is supposed to be like a Go and Babson, by the way. I've just never been there, so I can't verify that.

[@6:48](#) - **Matt (wissenweb.com)**

Oh, yeah. It looks kind of like it. You know, it's funny. That's a good representation of the students today.

Those ones might be a little bit more... Educated. Well, I'm speaking for public universities today, and the Babson ones are probably a little more sophisticated.

[@7:11](#) - **Melissa Ceden**o (EmberTribe)

Let's hope. All right, here is one that's a podcast style.

[@7:18](#) - **Matt (wissenweb.com)**

Hey, and by the way, could we just interview people at Babson?

[@7:23](#) - **Melissa Ceden**o (EmberTribe)

You could.

[@7:24](#) - **Matt (wissenweb.com)**

That a strategy. That would be a really clever way to...

[@7:29](#) - **Melissa Ceden**o (EmberTribe)

Yeah, you could.

[@7:31](#) - **Matt (wissenweb.com)**

Walking out of their business school.

[@7:32](#) - **Melissa Ceden0 (EmberTribe)**

Okay, go ahead. All right. A med student, an archaeologist, and a Harvard entrepreneur walk into a room.

[@7:39](#) - **Matt (wissenweb.com)**

Sounds like the start of a bad joke. What they built is called EntraWorld, and it might be the most practical business tool nobody's talking about yet.

The idea is simple. Most people with a great business idea never start. Not because they're not smart enough, not because the idea isn't good, because nobody shows them what to do next.

EntraWorld does. Think of it like a highway system for building a business. It puts in the road... The exits, the on-ramps.

AI walks you through every step, from validating your idea to building your pitch deck to getting in front of real investors.

Not a course, not a simulation, an actual system that takes you from idea to launch in weeks, not years.

Students are loving it, and schools are piloting it. It's called EntraWorld, the kind of thing you stumble on and can't believe you didn't know about sooner.

Oh, that was a good one. I like that one. Funny. So those are social posts, and could those be paid ads as well?

[@8:34](#) - **Melissa Ceden0 (EmberTribe)**

Yeah, for sure. Both. Also, know that this is a short turnaround, right? So I gave this to my team Friday morning, right?

[@8:44](#) - **Matt (wissenweb.com)**

So imagine if we had a higher lead time, then they could be refined or optimized or whatever.

[@8:50](#) - **Melissa Ceden0 (EmberTribe)**

So, and then these are three static ads. And in essence, here is built for people with big ideas joining up with them.

Innovators, Building the Future, 3.5% Acceleration, 90% Success Rate, Turn Your Idea Into a Business, Map Idea, Validate, Build, Find, Scale, obviously it would have copy, would have captions, things like that, as part of the ad, and then here's another one, Everything You Know to Launch a Startup, AI Tools, Investors, Team Building, All in One Place, a little bit more detail.

[@9:31](#) - **Matt (wisenweb.com)**

Got it, What do you think? Like it, yeah. The one thing I can, on those three ads, you said, like, the center one will have a cup of coffee and a napkin, and that's just the first draw up, the center one?

[@9:49](#) - **Melissa Cedeno (EmberTribe)**

I didn't mention anything about a cup of coffee or a napkin, but...

[@9:52](#) - **Matt (wisenweb.com)**

You didn't? I thought that's what you said, this would have a, like, I thought that was just the backdrop that was the blackened.

[@9:59](#) - **Melissa Cedeno (EmberTribe)**

Ha! Thank Oh, no. No, I was just saying that, in essence, these were done with a very short turnaround time.

So with more lead time, we'd be able to optimize everything and go back and forth on edits and stuff like that.

But because I know that there was a short turnaround time for my team, and then also you could skip the pitch.

This is, in essence, like, you know, good, but not fully optimized.

ACTION ITEM: Package plan + creatives for Larry call Apr 6 4:30; then Matt presents - [WATCH](#)

[@10:28](#) - **Matt (wisenweb.com)**

Yeah, I totally understand. Yeah, yeah, it's very good for the short turnaround over the Easter weekend, too. So, yeah, yeah, good, good work.

Yeah, I want to present it all to Larry. I have a call with Larry at 430.

[@10:44](#) - **Melissa Cedeno (EmberTribe)**

Okay.

[@10:45](#) - **Matt (wisenweb.com)**

So if you can package it in, you know, this is the plan. And I want him to get going immediately because there's going to be some, you know, lag time between we get the feedback.

Okay. The demo is going to be all niceties and cordial, oh great, nice to see you, we're not going to try to strike any deals at the end of the call, we're just going to try to schedule the face-to-face, because they asked for a demo, we really don't want to sell too much on the phone, I want to get in front of them to close, and so this will be a lot of good content, and then during the next week or two, in between the time that we do the presentation and the meeting, I want to just, you know, scorch the earth with them, with ads and targeting, is your, does your strategy include any geofencing just around their zip code, or their Boston area, or can we, can we talk about that?

[@11:49](#) - **Melissa Cedeno (EmberTribe)**

Yeah, so it would be CTB and Paragon, which is, but however, like, I just want it'd be really transparent. depends on when your third meetup would be, right?

[@12:06](#) - **Matt (wissenweb.com)**

setting these up do require time, and so if it's going to be something that's going to happen next week, we're going to delay it.

We're going to delay it as long as we need to so we can make sure that it's effective.

[@12:18](#) - **Melissa Cedeno (EmberTribe)**

Okay. Okay. Yeah. I just wanted to, I don't want you to get too used to us being super fast.

[@12:24](#) - **Matt (wissenweb.com)**

We're not even, we're still putting the buttons on some of the apps. You know, it's, it's not fully baked yet.

[@12:32](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@12:33](#) - **Matt (wissenweb.com)**

All right.

[@12:33](#) - **Melissa Cedeno (EmberTribe)**

Well, let me, let me go over the rest of this stuff because I know that you have to be there in 15 minutes.

So is it in 15 minutes that you have to be at the dentist or are you?

[@12:41](#) - **Matt (wissenweb.com)**

No, I don't have to be there until two. I have a half hour.

[@12:45](#) - **Melissa Cedeno (EmberTribe)**

Perfect. Okay. So here is in essence the full pitch, right? This is what you can give to Larry. This is just everything all included in one.

All right. So what we're recommending are a few days. We already went ahead and did a... We We technical SEO audit just to see where the website stands.

You threw it up super quickly. was built, you know, just super fast.

[@13:08](#) - **Matt (wissenweb.com)**

So I know it's not what your ideal website would look like, but we already gave some, you know, some recommendations and all of that, which you can review after our call.

[@13:19](#) - **Melissa Cedeno (EmberTribe)**

Is it salvageable or should it just be blown up and started from scratch? So we need to blow it up and start from scratch.

I'm just going to give you, and I have that included here, but you'll see. So the five audiences to, five audiences, five campaigns, right?

So students and young founders, struggling professionals, business partners, investors, schools, and education institutions. The reason why this is important is because on the website, each ICP gets its own landing page, messaging and ad creative.

So if we're going and doing ad creative, ad copy, whatever, for struggling professionals, we're going to send them to that landing page rather than the homepage.

And so each ICP would get their own page.

[@14:00](#) - **Matt (wissenweb.com)**

All right.

[@14:00](#) - **Melissa Cedeno (EmberTribe)**

Campaign infrastructure, five personas, five landing pages, exactly what I said. And then, all right, so this is the website part.

You know what, Matt, my computer is about to die. I need to go to my car and get my charger.

[@14:13](#) - **Matt (wissenweb.com)**

Can I, give me two minutes and I'll be right back. Go ahead.

[@14:17](#) - **Melissa Cedeno (EmberTribe)**

All right.

[@14:17](#) - **Matt (wissenweb.com)**

No problem.

[@15:56](#) - **Melissa Cedeno (EmberTribe)**

All right, Matt, here we are.

[@15:58](#) - **Matt (wissenweb.com)**

Okay. Okay.

[@15:59](#) - **Melissa Cedeno (EmberTribe)**

So... So for the website, what I was saying was to build it on a CMS, like Webflow, so you would still use, which is exactly what we just did, right, so we navigated over away from HubSpot to Go High Level, and then Webflow is our CMS, so that's like our website platform, but all of our CRM is still on Go High Level, all of our organizations, all of that.

We found that the tech stack there is going to be much better than trying to do a website on Go High Level, so that's what I was saying the other day.

[@16:35](#) - **Matt (wisenweb.com)**

Yeah, like, is that the same as like Hayflow? Hayflow has the, they build landing pages and funnels?

[@16:43](#) - **Melissa Cedeno (EmberTribe)**

No, it's like, it's a WordPress, but the functionality of Webflow is a lot, I don't know, much more professional.

So the design, you can do a lot more custom stuff. But And It VoIIA So Also, not custom. So it has a good range, whereas WordPress can sometimes be chunky and a little bit kind of like a puzzle where you put together.

Webflow has a lot of very great functionalities, and so it's an elevated option in WordPress.

[@17:18](#) - **Matt (wisenweb.com)**

Okay, good. That makes sense. I remember using WordPress 10 years ago, and it was kind of clunky back then.

[@17:29](#) - **Melissa Cedeno (EmberTribe)**

Yeah. Give me one second. Okay. And then, all right, so then, you know, it'll have different pages on it depending on, like I said, the ICP and be conversion focused.

So we can keep the branding for the teal and the gold, but in essence, have it be a tight branding and a tight design for it.

So here are the pages that we are recommending for each of the ICPs, but in totality as well. So home, how it works, pricing for founders, for schools, for partners, for investors, about, blog, contact, Google, and then here are the ICP landing pages.

Any questions about this?

[@18:25](#) - **Matt (wisenweb.com)**

Those are just the button headers for each page that we're going to require, like a site map of them?

These are all the pages that are going to be required?

[@18:38](#) - **Melissa Cedeno (EmberTribe)**

Yeah, so these are pages. These aren't buttons. This is just me showing you, you know, since the...

[@18:43](#) - **Matt (wisenweb.com)**

Yeah, yeah, that's what I mean.

[@18:44](#) - **Melissa Ceden0 (EmberTribe)**

Yeah, okay. Yeah, yeah, yeah. So these would be, at a minimum, the pages that we recommend in order for the website to be able to tell the story that we want to tell for the different ICPs.

[@18:54](#) - **Matt (wisenweb.com)**

And the flow. So I'm going to kind of, I think we talked... We about it briefly, but the five personas or targets are going to have five pages and five abouts and five different campaigns, maybe, you know, two per, and then the message will guide them to the appropriate login as well.

Can we, can we, can we have it? So each visitor enters with a, some kind of, you know, trigger code.

Um, when they, when they actually sign up, we want them to have a different experience on the platform side as well.

A different set of questions, a different set of, you know, a survey to set up their account.

[@19:41](#) - **Melissa Ceden0 (EmberTribe)**

Well, this is not, this is not for the platform. This is for your website.

[@19:46](#) - **Matt (wisenweb.com)**

No, no, I know. I know. know. But can we build in, can we build in a workflow from each one of these individual?

I'm sure the answer is yes. I'm using, um, the high level, go high level. So we know where it's coming from, where it's being redirected to.

Yeah, then we'll assign it the appropriate registration platform. Okay.

[@20:12](#) - **Melissa Ceden0 (EmberTribe)**

Yes. And you'll see, I go into in the Go High Level setup, I go into that a little bit more.

[@20:17](#) - **Matt (wisenweb.com)**

Okay, good.

[@20:19](#) - **Melissa Cedeno (EmberTribe)**

But yeah, so I do want to rewind a little bit because you said, hey, each ICP would have its own about page.

[@20:25](#) - **Matt (wisenweb.com)**

Do you mean an about page as a whole, or do you mean that each ICP would have a section on your language page?

ICP. Just ICP, yeah.

[@20:34](#) - **Melissa Cedeno (EmberTribe)**

Okay. Okay, great. Yeah. Because these would all be just one homepage, one how it works, one pricing page, but all of the ICPs would have their own page with different copy and creative and things like that.

[@20:50](#) - **Matt (wisenweb.com)**

Yeah. Okay, good.

[@20:51](#) - **Melissa Cedeno (EmberTribe)**

Okay. Okay. So for audience-focused pages in the lean nav, so for founders, students, and professionals, for schools, Entrastart, for partners, marketplace, and for...

Investors enter pools with log categories mapped to all, so this is in the cluster magic, all the articles that we would be doing, those articles are going to map to all five ICPs, so every article funnels into the right audience, right?

Not one article is going to go into five, but instead a portion of each article, of all the articles are going to go into each of the ICPs.

[@21:22](#) - **Matt (wisenweb.com)**

Gotcha. Gotcha.

[@21:23](#) - **Melissa Cedeno (EmberTribe)**

Cool. All right. So, when it comes to services and phased out. All right. So, website, you design, Webflow. So, full design and build on Webflow.

So, 10 core pages across the blog CMS, responsive across all different types of devices, your branding, like I said, your persona, ICP pages, the lead capture forms on every page.

So, this is, I think, what you were talking about, but I also go into greater detail a little bit down below.

So, connect to GoHighLevel, GA4 and DTM set up with event tracking. This is going to be really important for ads.

schema markup, and then Webflow CMS for blog. with, All of that's also going to include SEO content and SEO and content engine.

So the technical SEO, auto-willed, a partial part of it. The full funnel keyword research, the 40 articles, cluster and magic that we had already talked about.

The topic clusters, internal linking, and then the keyword refresh. And then when it comes to paid media for Google, Meta, and LinkedIn.

So the different campaign architectures for the five audiences, five funnels, Google and Meta, is going to be used for broad acquisition.

I also included LinkedIn for investor parts and professional software. I showed you earlier for the Babson new campaign. For the college, campus specific campaigns is needed.

So geo-fencing, radius, radius targeting. And then again... We want to retarget those freemium users so that they become paid users, and then to do event tracking.

So if they're signing up as a freemium signup, that's going to be your primary event tracker, but then we also need to set up trackers for engagement apps and upgrade so that we can do secondary and retargeting campaigns as well.

[@23:21](#) - **Matt (wisenweb.com)**

And then just quickly... Oh, go ahead. Finish this.

[@23:24](#) - **Melissa Cedeno (EmberTribe)**

No, in essence, it's, you know, just a recap of whatever I was already saying. What questions do you have?

[@23:31](#) - **Matt (wisenweb.com)**

Well, I question about the registration process itself, because that's the most important thing. That's, you know, the conversion is all there is.

We are going to publish the iPhone and the Google Android app, and we're going to use this. It's a service.

And maybe you guys know of somebody... I mean, there's multiple ways to get someone to fill out a form or to convert or to pay or subscribe.

Yeah. Yeah. I I've had so many different encounters lately, and some of them are very unique, some of them are engaging, some of them are tedious, drawn out, too many, you know, redirects.

And what Allah suggested is we use this service that takes care of the payroll. We use Stripe already, but they basically collect all the money and do the subscription and pay the Microsoft, I mean, the, excuse me, the Google and Apple fee for the app, you know, they, you know, they take 25 to 33% of every, of every app download.

Do you guys manage any type of advertising across those platforms, Apple and Google or the app stores?

[@24:51](#) - **Melissa Ceden** (EmberTribe)

Yeah.

[@24:52](#) - **Matt (wissenweb.com)**

Okay.

[@24:53](#) - **Melissa Ceden** (EmberTribe)

I did not include, I did not include that in this. I could.

[@24:56](#) - **Matt (wissenweb.com)**

No, we don't need it yet, but when we do launch the apps. Which will be phase 1.2.

[@25:02](#) - **Melissa Ceden** (EmberTribe)

Yeah.

[@25:03](#) - **Matt (wissenweb.com)**

Hmm.

[@25:04](#) - **Melissa Cedeno (EmberTribe)**

Yeah. We advertise on that as well.

[@25:06](#) - **Matt (wisenweb.com)**

Okay. Good.

[@25:08](#) - **Melissa Cedeno (EmberTribe)**

Okay. So go high level setup and automation, which I think is part of what you were also asking earlier.

So the go high level counts. This is new. I did not pitch this before, but as I got together with everyone, we realized how important it was going to be for this to be done correctly and from the very beginning because tracking and triggers and all of that is going to be enabled by this setup.

So the full go high level account setup and configuration, CRM pipelines. So again, going from freemium engaged, trial paid, lead capture forms integrated with the Webflow, email onboarding sequence, so 5% of emails for the freemium users.

And then you're going to, we want to talk, we want to nurture them from freemium. It's okay. Theos closer AI webinar kit and tool new integration is going to be important.

then dashboard reporting for Python visibility. So So now you're getting all of that, which is for you. I do not include that, but we...

[@26:07](#) - **Matt (wisenweb.com)**

we want your suggestion, too. We want your suggestion about how well HighLevel integrates with the sales closer or the webinar kit.

I mean, they claim to be deeply integrated partners, but I'm still implementing all three of those.

[@26:27](#) - **Melissa Cedeno (EmberTribe)**

And it's, I mean, it's, it's already super complicated. Yeah. Yeah, it is. I will always give you our recommendations because it's going to be to our, to our benefit to have you have everything turn out really well.

[@26:42](#) - **Matt (wisenweb.com)**

So... Yeah. If there's an, if there's an AI sales agent that you guys recommend more than sales closer, we'll switch.

[@26:49](#) - **Melissa Cedeno (EmberTribe)**

We're not loyal to them. Yeah. All right. So here is a six month timeline, foundation and build. So first, and I'm, I have a whole set up here that you'll see, but just...

That's to give you a rundown for each month. So foundation and build is month one, 9,500 in services because we added the same stuff like the CRM and also the workflow.

again, it gives you a better rundown in the next section. That includes the site, the technical SEO, the high-level setup, the tracking for GA4 and GTM, and then the beginning of the paid media campaigns.

Then month two, it is new site goes live, the 301 redirects from the Butternut site, the go high-level automations deployed, nurture sequences.

So those are the emails and SMS. And then the first 40 cluster nitric articles are published and then paid campaigns launch across all five ICT funnels.

Month three, optimizing scale. So 40 more articles, but now you're going have a total of 19 articles by the end of month three.

Paid media optimization. This is where Reddit is going to begin. Okay. I keep saying amplifier because it's just easier to say that, but again, it could be...

Amplifier or something similar.

[@28:02](#) - **Matt (wissenweb.com)**

No, it doesn't matter to us. doesn't matter to us. In fact, Amplifier is not even fully released yet.

[@28:09](#) - **Melissa Cedeno (EmberTribe)**

The DIY one is. The one that is better is not fully released. But I keep saying that so you understand what we're referencing.

[@28:18](#) - **Matt (wissenweb.com)**

And so you understand. We don't care. If you recommend something that's comparable, we'll take your recommendation because we want you to be able to be more effective.

[@28:27](#) - **Melissa Cedeno (EmberTribe)**

Yeah. No, for sure. But I keep saying Amplifier just because it's a frame that we would both understand what we're talking about.

[@28:34](#) - **Matt (wissenweb.com)**

Yeah.

[@28:34](#) - **Melissa Ceden0 (EmberTribe)**

Organic social media would begin. Polygons and TV campaigns. Email and SMS campaigns. Content gap analysis for competitors and then the Q2 editorial calendar.

We would also produce it in month three. And then a monthly strategy review and performance reporting.

[@28:53](#) - **Matt (wissenweb.com)**

Can you scroll? Can you scroll down? I'm on the phone.

[@28:56](#) - **Melissa Ceden0 (EmberTribe)**

Yeah. Okay. Thanks. Oh, yeah. Okay. So here is now we're going to expand and double down, right? So we're going to redirect paid budget towards top-performing IZP from month-free data.

Reddit seeding continues, email and SMS is going to be at full capacity. And then at this point, we would have 130% already indexed on the site.

And then month five, a lot of it is going to be just the same, but we're going to be optimizing.

We're going to be choosing the data points that make the most sense to focus on and put our ad spend there.

And again, this all goes increasing in terms of the articles and organic traffic that is going to compound based on the amount of articles that you've already established at that point.

[@29:37](#) - **Matt (wissenweb.com)**

And what is the scope of the geography of what we're talking about? And let's say the first three months versus the second three, because we've touched upon this in our conversation.

We're not limited to any one country, one boundary, one border. Or we could focus on, like we mentioned earlier, one Latin American country.

Or a whole continent. Or just work on a region in the U.S. first and then expand. Or do a light general branding across the whole U.S.

and then focus hard on five cities or something. Just so we meet the objectives. Wherever the conversions are coming in, and whatever channel it is, the better, we'll front load a lot more into that so we can get a lot of traction early on.

[@30:27](#) - **Melissa Cedeno (EmberTribe)**

Agreed. We first need data, right?

[@30:30](#) - **Matt (wissenweb.com)**

So that we're not going all spaghetti at the wall and seeing what sticks.

[@30:34](#) - **Melissa Cedeno (EmberTribe)**

But we first need some data and we'll optimize according to that data as it comes in. Alright, so let's go over here because this will give you a better rundown of what everything is.

Is it really loud? Do you hear the baby crying?

[@30:52](#) - **Matt (wissenweb.com)**

you hear it now? Yeah, I can hear you.

[@30:55](#) - **Melissa Cedeno (EmberTribe)**

No, but do you hear the baby crying?

[@30:57](#) - **Matt (wissenweb.com)**

Is it really loud because now there's somebody with a baby right No, no, I don't- I don't, I don't hear.

[@31:01](#) - **Melissa Cedeno (EmberTribe)**

Did you just have a baby?

[@31:03](#) - **Matt (wissenweb.com)**

No, I'm at a cafe. I was going to say, that was quick. Wow.

[@31:10](#) - **Melissa Cedeno (EmberTribe)**

No, there's a baby.

[@31:12](#) - **Matt (wissenweb.com)**

Go ahead, your question. I was going to say, you know, this is a good, good, you know, dry run for us here.

I would love for you, maybe in a day or two, present this directly to Larry, if you're up for it.

[@31:29](#) - **Melissa Cedeno (EmberTribe)**

Absolutely.

[@31:30](#) - **Matt (wissenweb.com)**

Perfect. Okay.

[@31:32](#) - **Melissa Cedeno (EmberTribe)**

All right. So website redesign, what we're doing is we're, we're dispersing the cost of that into two months in order to try to keep it at that monthly budget or close to it that you had initially mentioned.

So the website redesign, the SEO and technical optimizations, again, same thing. Anything that's going to be, that we're trying to disperse the budget, would be between month one and month two.

Cluster magic content. So these are the articles. Those are 40 articles per month at \$1,500. The Goal High Level Automation and Setup, the full integration of Twilio and all of the other things that we find necessary, tracking, triggers, contact forms, all of that would be split up into both months in order to ease the budget.

And then paid medium management is that \$3,500 per month. And that is including Google, Meta, which is Facebook and Instagram, and then also I see LinkedIn.

Okay. Reddit seeding, I put it at month three, because, you you can make space for those other setup deliverables and work.

Amplifier or whatever that is, also starting on month three and going forward. Organic social media for the same. Email and SMS campaigns, so these are the ones that we're targeting and nurturing on framing users into paid converter users.

And then Polygon and CTV, which I haven't heard about a little bit later, but that also is here. So, this is Service Space and then this is.

There's ad spend, proposed ad spend, again, depending on the data that comes in, we either increase, we're going to move around, shift around, it's all going to be based on the data.

[@33:10](#) - **Matt (wissenweb.com)**

Gotcha. Okay, good.

[@33:13](#) - **Melissa Cedenno (EmberTribe)**

All right, so when we're looking, also you had asked me about the ad hoc social media credits and maybe we wanted something that was like different than what we had already scheduled and created and whatever, then we can do the ad hoc social media credits.

So it could be 5, 10, 20, and it would be broken down as such.

[@33:35](#) - **Matt (wissenweb.com)**

Okay.

[@33:35](#) - **Melissa Cedenno (EmberTribe)**

And then the Polygon CTV. So because the CTV and Polygon RDSP requires us to put up the ad spend up cent, it's a little bit different.

I can't just easily say, hey, this is our management fee. Our management fee is baked into the ad spend.

So the way that it works is, just as an example, your \$1,500 per month card on a CTV line item.

Fathom is an average, right? Your ad spend is at cost, it's just passed directly, plus a 10% management fee of whatever your ad spend is, and then the creatives are going to be 600%.

So the 600% is, we have to do six different sizes when it comes to Polygon, because it's going to be on display, on mobile, and whatever.

And so all of those, for that one creative, has six sets. Or for CTV, a 15-second to 30-second commercial, that also counts as a per set.

So I did not want to write that here, because this is going to be determined on what you want to do, your budget, what we recommend, what we see, the data, and stuff like that.

So I just wanted to call out that this is a little bit different, and not quite as black and white of the 1500, but it wouldn't be a surprise to you or Mary.

It'd be something that we talk about ahead of time, and we go into the next month, knowing exactly what we're going to do when it comes to that.

[@34:55](#) - **Matt (wisenweb.com)**

Okay, right. And what are your team's thoughts? What team's What actually achieving these, I think, conservative goals for 10% conversion of 100,000 leaves?

[@35:12](#) - **Melissa Cedeno (EmberTribe)**

So my director of growth was a little bit concerned about a \$5,000 ad spend dispersed against three, four different channels.

But again, because it has not been done before, especially because it's almost a brand new type of initiative. It's not something that the public already knows and that it's easy for them to understand.

We're going to have to see what the \$5,000 does, right? And that's why I did not want to start Polygon right away because I would rather be able to use that ad spend for the major paid media channels and then see how the ad spend is going.

[@35:49](#) - **Matt (wisenweb.com)**

Okay. And hopefully, once we see some data, we'll have some positive results and we can adjust budgets in months four, five, and six.

project with horas. Add you.

[@36:01](#) - **Melissa Cedeno (EmberTribe)**

Exactly. This is fluid. Nothing that we ever do is going to be set in stone, except for right before we land, right?

But we want to be able to adjust and be fluid with the data rather than be stuck into something that is not going to work.

We've already done a bunch of different A-B tests, all right? All right, so I already talked about that. Okay, so here's that, I already went over this.

So this is in essence the, oh no, this is the Babson College. This is just a recap, all right?

So the campus and event targeting for the following on MC2V. That is that, that overview of that strategy, the AI creative production.

So the things that we will be doing and using link AI, and then the channel phase of strategy, right?

So month one, two, three, four, five, again, foundation, scale, optimize, optimize, right? Let the data tell us how, how we are going to behave in month four and five, so we can optimize it.

[@37:01](#) - Matt (wisenweb.com)

Okay.

[@37:02](#) - Melissa Ceden0 (EmberTribe)

All right. Measurement, I already told you this, you know, it's important to GA4, GTM, Search Console, all of that is going to be interconnected with to a higher level and with Webflow in order to be able to see that data that we need.

And then Babson College overview, this I already discussed with you and I already showed you the creatives. And this is just a little bit about kind of the overview of YS.

So all of the different things that you'll get in terms of the scope and then the proposed outcome and able to be able to tell Larry, either you or me, as to what the benefits are in working with our team.

ACTION ITEM: Research and recommend initial lead-list sources/quantities for Babson students/faculty/alumni; share w/ Matt - [WATCH](#)

[@37:39](#) - Matt (wisenweb.com)

Sure. And that's it. then, last question. What sources do you have to buy some initial leads? I mean...

[@37:48](#) - Melissa Ceden0 (EmberTribe)

Oh, you had asked me that. I'm so sorry, Matt. I did not look into that and I apologize.

[@37:54](#) - Matt (wisenweb.com)

We don't have to include them. We'll put them as a separate line item and we can purchase them directly.

But if you guys can... Tell us who you think, where you think, how much we need, because we know we're going to have to prime the pump somewhat.

[@38:08](#) - Melissa Ceden0 (EmberTribe)

We can't just start sending out emails to no list. We have to have a list. Yeah, exactly. But that list can also be because we're going to be pushing that freemium, you know, tier.

[@38:21](#) - Matt (wisenweb.com)

Of course, we're going to build it quickly. I'm talking about the first month. Yeah, the first month. want to buy up all of the student body at Babson and all the faculty members and all of the, you know, surrounding ancillary educational, you know, affiliate groups that are, you know, graduates of Babson.

I mean, you can pretty much buy anything today.

[@38:43](#) - **Melissa Cedenno (EmberTribe)**

Yeah. No, for sure. Let me look into that for you.

[@38:46](#) - **Matt (wissenweb.com)**

And then know that, yeah, I'll have to, I'll have to give you a better answer because I did not work into it.

And I'm so sorry. I apologize about that. But no, no, no problem. No problem. It was a busy weekend.

[@38:59](#) - **Melissa Cedenno (EmberTribe)**

You did a great job. Thank you. Don't worry about it. I appreciate it. Any other questions about this or consultations or anything that you think Larry's going to be like?

[@39:08](#) - **Matt (wissenweb.com)**

not at all. Not at all. I'm anxious to get Larry to see the big picture because I've been building towards this.

I mean, you saw my notes and then I combined them with yours. And then I've been creating things, trying to sell Larry as much as I'm trying to sell the idea to our partners.

I mean, some of the meetings I had with your competitors, by the way, were almost a joke. I mean, I knew more about marketing and I don't know anything about marketing.

I know how to start businesses and I know that I need marketing and I know what works and what doesn't.

But to get into the weeds with it, I'm not going to pretend. That's why I need people like you.

Number two, I had some of them that were like so overbearing and saying they could do everything when I'd ask them a question about...

You know, the goals, like, oh, well, you know, just throw some mud at the wall and see what sticks.

Like, that's not really a strategy, but, so I'm glad that you got very specific. And then the third thing is, some of these tools are completely, you know, new and green.

There's no data, there's no, I mean, they're super cheap and sometimes they're too good to be true. Like, like the Amplifier one, I went and did one of their hour-long courses, too, over the weekend.

And half the is not even baked yet. It's crap.

[@40:39](#) - **Melissa Cedeno (EmberTribe)**

not only that, but also the output, I found to be very, like, tacky. And it was just not quality.

[@40:47](#) - **Matt (wisenweb.com)**

Yeah, but their marketing is pretty good, though. They have ads and great, great, you know, their, their, their diagrams and what they can do for you.

And they're fast-talking Australian sales guys. They're pretty good. It's kind of like, um, famous AI. It's the same, it's the same thing.

[@41:07](#) - **Melissa Cedeno (EmberTribe)**

Yeah, that's why I was hesitant when you first mentioned it. I was like, okay, I get you.

[@41:12](#) - **Matt (wisenweb.com)**

No, well, well, we're on a free, we were on a free trial, so there's no harm, no foul.

[@41:16](#) - **Melissa Cedeno (EmberTribe)**

Yeah. Yeah.

[@41:17](#) - **Matt (wisenweb.com)**

Yeah. And then the other ones, um, some of them like vibe, just do TV and some of them, you know, and there's what the ZB one does just social, I think.

And then I, yeah, I mean, we, I knew we need, we need something though, to make creative. We, and I thought another one, marketer.com, marketer, there's a bunch of like, all they do is, and sometimes those are great.

One tool that does something very well, and you plug it into the rest of your strategy, instead of trying to do it yourself.

We don't want to do any manually, manual posting. Except when we have a special event and we want to be interviewed or something.

[@42:04](#) - **Melissa Cedeno (EmberTribe)**

Other than that, we want a machine just processing.

[@42:08](#) - **Matt (wissenweb.com)**

If we can get to a 3X ROAS and 33% attrition, the company is going to be super profitable and they'll just keep putting money in the machine forever until it's sold.

Yeah.

[@42:26](#) - **Melissa Cedeno (EmberTribe)**

Well, listen, Matt, I never make any guarantees because anybody that can guarantee anything in marketing is selling you.

[@42:32](#) - **Matt (wissenweb.com)**

Yeah, I know, I know.

[@42:34](#) - **Melissa Cedeno (EmberTribe)**

You know, so I can tell you this. I can tell you that we'll give it everything we've got. We'll strategize, we'll put our heads down, we'll go to work, and then we'll iterate based on the data that comes in.

So that is, we follow best practices, but also using AI tools, but we also have a human team so that it's not wonky, so that it's not crap, and so that it's efficient, but high quality.

[@42:59](#) - **Matt (wissenweb.com)**

Thanks. Thanks. Thanks, Thanks, while orlingt Yeah, and the good thing about universities, they're very slow-moving machines, and they got lots and lots of money, and what we're asking them for is nothing.

It's more about getting them to think it's a good idea. We don't even have to mention money.

[@43:21](#) - **Melissa Cedeno (EmberTribe)**

It's also catching them at the right time, though, when they're putting together their budget for the next year. That timing is going to be really important because they've pre-planned their budget, even though they're not going to follow it.

But I can see that being something that they say, so just have to come up with some sort of overcoming that.

[@43:43](#) - **Matt (wisenweb.com)**

Just so you understand, if we never get a dime from them and only get a basic reputation-builder alliance with them, it gives instant credibility to this platform if Babson's associated whatsoever.

Yeah. And if we just use it, because over the weekend, a Babson alum called my old business partner, Billy, the one that's the tennis partner of the billionaire, Dean Metropolis, how I got this opportunity.

Just total coincidence. He's sitting at the country club, excuse me, at the ski lodge this weekend. And they're just chatting about, he's like, you know what, I want to invest in one of these AI companies.

He says this to my friend, Billy, and he goes like, how much do you want to invest? And he's like, I don't know, a couple million.

And, and he goes, I got just the opportunity for you.

[@44:39](#) - **Melissa Ceden0 (EmberTribe)**

Dean Metropolis is already evaluating them. Babson's on board. I mean, and if we win this, it could just be to get the two million for the angel.

Yeah.

[@44:50](#) - **Matt (wisenweb.com)**

And then at that point, a million dollars of that, of that money is going straight to you. Think about it that way.

That's, that's the way. Yeah. Yeah. And because it'll shoot three million out the other end.

[@45:04](#) - **Melissa Ceden0 (EmberTribe)**

Yeah. If we can validate it, that's, that's the angle.

[@45:08](#) - **Matt (wisenweb.com)**

Yeah, that's, that's the angle. So we want to, you know, start, you know, with a very firm, creative and, and very, very, I would say, unique approach to this because I don't want to look like a flash in the pan.

You know, AI that promises everything, someone, what I've been telling Larry on the phone is what we've done is merged, blended old traditional business development incubator practices, you know, going through all the

steps, making sure every box is checked to, you know, and, and, and building the company with the, the long-term vision, not let's make an app and try to sell it for three weeks before it, it fizzles out.

I mean. I I The companies are making money doing that. I know that, but Larry wants to leave Enterworld as a legacy and he wants it to grow and be there after he's gone.

He's an older guy. think he's 70. And he said, you know, all these years and all the companies I started, if I would have had a tool like this, my God, I could have brought five businesses to market at a time, which anyone could do.

[@46:30](#) - **Melissa Cedeno (EmberTribe)**

Yeah, it's very possible now.

[@46:33](#) - **Matt (wisenweb.com)**

Because, because remember also when we get members in, they're also collaborating. We have a couple hundred people on the platform now that are exchanging ideas and, and they're on the message boards.

I logged in.

[@46:46](#) - **Melissa Cedeno (EmberTribe)**

I logged in. I saw. Yeah.

[@46:48](#) - **Matt (wisenweb.com)**

Yeah. Yeah. It's just getting started and we're not even released. We're not even launched yet.

[@46:53](#) - **Melissa Cedeno (EmberTribe)**

Yeah, I agree.

[@46:55](#) - **Matt (wisenweb.com)**

Yeah. And the inner circle pages are the private ones. Yes. Yeah. Thank That's your business colleagues, your team. I've got hundreds and hundreds of messages on there a week.

I mean, and it's like Reddit, but it's just for my business and a like-minded person's business.

[@47:13](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@47:15](#) - **Matt (wisenweb.com)**

But it needs a lot of work. I mean, the website first, I'm glad that you agreed that, you know, that website was a placeholder to get to the Babson meeting because we couldn't get the Babson meeting.

We could have never even had this call if we wouldn't have had something there to look like a website.

[@47:35](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@47:35](#) - **Matt (wisenweb.com)**

That's what it is. That is literally a facade. There's no SEO built into it.

[@47:41](#) - **Melissa Cedeno (EmberTribe)**

And I know that. Yeah. Yeah. But also there's, you know, there's just, it's, I think just the design of it also.

It doesn't necessarily, yeah, it doesn't necessarily scream, you know, high values, innovation. And so I think there's a good opportunity there, but again.

Yeah. Yeah. Yeah. Thank You just set that expectation and say, look, I just threw something up that's a placeholder.

I already have a team that's fully working on something custom.

[@48:09](#) - **Matt (wisenweb.com)**

Yeah, Larry knows that already.

[@48:11](#) - **Melissa Cedeno (EmberTribe)**

Yeah, so Matt, I know you have an appointment in nine minutes.

[@48:16](#) - **Matt (wisenweb.com)**

Yeah, it's across the street. Thank you so much for your time. Thanks for putting that together. I'll send that over to you.

Okay.

[@48:24](#) - **Melissa Cedeno (EmberTribe)**

You can use the videos and the assets that we created for your pitch.

[@48:28](#) - **Matt (wisenweb.com)**

I hope that they help. you.

[@48:29](#) - **Melissa Cedeno (EmberTribe)**

And then do let me know what, what do you think in terms of me pitching it to Larry and next steps?

[@48:37](#) - **Matt (wisenweb.com)**

Well, we'll probably Wednesday, by Thursday, Thursday. I got to go to a wedding on Thursday, Friday. So Thursday, you know, at the, at the minimum, at the minimum, I'll let you talk directly to, to Larry too.

[@48:58](#) - **Melissa Cedeno (EmberTribe)**

everyone. Thank Thank All right. All Thank

[@49:01](#) - **Matt (wisenweb.com)**

And here's the reason why. That you two can speak freely about the website. I'm knowing what you just told me.

And you don't have to try to sugarcoat anything in front of Larry, because Larry provided a lot of the copy for the original website, and he says, can you make this look better?

And so I made Butternut in 15 minutes by taking his copy and using AI wizards. And I did make a couple photos and, and, and, you know, I built the menu with a broad blog and all that stuff, because he didn't have, he had one webpage with everything on one page with a couple buttons that went to other pages that weren't even.

Yeah. So he thinks that Butternut's good. And I was like, Larry, it's \$19 a month. Well, I can't be that good.

That's all it costs. 19 bucks a month.

[@49:59](#) - **Melissa Ceden**o (EmberTribe)

Which. That's what Webflow costs, by the way.

[@50:01](#) - **Matt (wisenweb.com)**

think it was \$14, whatever it is that I told you. Yeah.

[@50:05](#) - **Melissa Ceden**o (EmberTribe)

But of course, that's just to be able to have that as your platform, but you have to design it and develop it.

ACTION ITEM: Email Matt strategy deck link + calendar link; then Matt books Larry call Apr 8–9 -
[WATCH](#)

[@50:13](#) - **Matt (wisenweb.com)**

But Butternut's good for someone that wants to sell a t-shirt online. That's about it.

[@50:18](#) - **Melissa Ceden**o (EmberTribe)

Yeah. I would say that there's a lot to be left in that. All right.

[@50:23](#) - **Matt (wisenweb.com)**

How about this?

[@50:24](#) - **Melissa Ceden**o (EmberTribe)

I'll send you the link to this presentation. From that presentation directly, you can get the assets, because I made them clickable.

And then I'll also send you my link for my calendar, so that either you or Larry, whichever one of you can book a time for me to have a discussion with Larry.

[@50:42](#) - **Matt (wisenweb.com)**

Yeah. Maybe both of us on Wednesday. We'll do a follow up after our presentation.

[@50:47](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@50:48](#) - **Matt (wisenweb.com)**

And that way we can tell you how it went, and then you can get on the momentum with him.

And we'll get the agreement signed by Friday.

[@50:58](#) - **Melissa Cedeno (EmberTribe)**

Yeah. Hopefully get Hopefully it goes well so he's not upset.

[@51:04](#) - **Matt (wisenweb.com)**

I'm not catching him at the end of a call.

[@51:06](#) - **Melissa Cedeno (EmberTribe)**

No, it's not going to go bad.

[@51:13](#) - **Matt (wisenweb.com)**

It's more than he even expected. The video and the presentation looked fine. We're trying to get them to show us their cards.

They're building a console, it's called, and it's a validation predictability application that you could put in an idea that tells you the probability to get funded and be successful, which is perfect for what we're doing.

We're doing all of the, you know, the early stage grassroots stuff and they can, you know, put the cream of the crop, the top 10% of ours into their system, separate the wheat from the chaff and get going on starting million dollar endeavors.

got on you All right. I do have to go. got five minutes.

[@52:02](#) - **Melissa Cedeno (EmberTribe)**

Thanks so much.

[@52:03](#) - **Matt (wissenweb.com)**

Of course. a great day. Thank you. Bye-bye.

[@52:06](#) - **Melissa Cedeno (EmberTribe)**

All right. Bye.
