

# EmberTribe + Matthew Weisensee - March 25

[VIEW RECORDING - 67 mins \(No highlights\)](#)

[@0:04](#) - **Matt Weisensee (wisenweb.com)**

Hello.

[@0:09](#) - **Melissa Cedenno (EmberTribe)**

Hey, Matthew.

[@0:11](#) - **Matt Weisensee (wisenweb.com)**

Hi, Melissa. How are you?

[@0:13](#) - **Melissa Cedenno (EmberTribe)**

Good. How are you?

[@0:15](#) - **Matt Weisensee (wisenweb.com)**

I'm pretty busy. Gosh, it's 12-hour days for the next week. My customer's launching. So lots of implementations, marketing, advertising, sales agents, preparing for a big presentation and a demo.

And we're still, you know, putting the last pieces on the platform. So just another day, you know, technology world.

[@0:44](#) - **Melissa Cedenno (EmberTribe)**

Yeah, that's a lot.

[@0:45](#) - **Matt Weisensee (wisenweb.com)**

That's a lot. Yeah. And it's a small company. It's a startup, but it's an incubator for startups. And all the members of this team have started 10 companies themselves before.

We all know how to do it, but we're trying to make a really logical, simple AI-powered incubator platform that's called EntraWorld, and so far, we've got a good reception from people, but we have to put some sizzle on it before we start promoting it.

[@1:21](#) - **Melissa Ceden**o (EmberTribe)

Yeah, of course. Of course. Well, I'm excited to have a chat with you. I was looking at your site a bit earlier today.

Where are you located?

[@1:31](#) - **Matt Weisensee** (wissenweb.com)

Laguna Beach and Cape Coral, Florida, but I'm in Palm Springs.

[@1:35](#) - **Melissa Ceden**o (EmberTribe)

Okay. All right.

[@1:36](#) - **Matt Weisensee** (wissenweb.com)

Yeah. I'm in New Orleans right now.

[@1:38](#) - **Melissa Ceden**o (EmberTribe)

Oh, of course. So, yeah. Different parts. Yeah, I am originally from Miami, but we moved to North Carolina, the Wilmington area, the coast, about two and a half years ago, so.

[@1:49](#) - **Matt Weisensee** (wissenweb.com)

Oh, what part of North Carolina?

[@1:51](#) - **Melissa Ceden**o (EmberTribe)

The Wilmington area, the coast.

[@1:53](#) - **Matt Weisensee** (wissenweb.com)

Oh, Wilmington, you said. Oh, okay. Oh, I used to live in Raleigh. And...

[@2:00](#) - **Melissa Cedeno (EmberTribe)**

And then my mom lived in Asheville, so I know it pretty well. Yeah, yeah, yeah. So definitely, we go to Raleigh all the time for the airport.

Sometimes it has better flights. And then Asheville for the mountains, because Wilmington's nice. I like it. Yeah, it is nice.

Well, I'm excited to speak with you. I always start off my calls. So I'm the director of accounts at EmberTribe, and we are a full funnel marketing strategy, a marketing agency.

Essentially, what that means is wherever your ideal customer profile is on the web, that's where we are, too. So whether it's paid ads like Meta, Google, PPC, LinkedIn, whatever, or if it's organic social media or SEO, all of those things are within our wheelhouse and things that we've been doing for years.

So with that being said, I do always like to ask, what prompted you to make this call with me today?

[@2:52](#) - **Matt Weisensee (wissenweb.com)**

I try to recall. I've evaluated about 25 platforms, 10 agencies. you. Yes. 25 AI-based tools for social media, SEO, CTV, basically everything in Omnichannel.

I'm trying to see what is out there today. mean, marketing has evolved so much in the last two years.

I mean, the old brick-and-mortar model doesn't work anymore. And I'm trying to find somebody that's full service that can take over.

We're assembling the basic tools so we can make sure we're capturing our own leads and our own data because we're going to have eventually our own local territories.

We're going to split this into kind of like a franchise-type network. But the reason why we have to have localization is because we're going to have local youth groups, local schools, all kinds of the community is going to grow organically from the local advantage.

But right now, we're building. We're putting the highways in, and then we're eventually put the exits and on-ramps, and then we're going to put the gas stations, and then the fast food across the street from those on every, and rest areas, et cetera.

So we call it the EntraPath, and the EntraPath is a logical way to take any idea from validation through innovation, orchestration.

It's all parts of the puzzle to start a business. Anyone's idea of turning passion to profit can be realized in weeks, not months, not years, and instead of just giving somebody a big master AI, you know, perplexity type of interface, We wanted to educate the people as well as help them understand.

Kind of like an MBA in a bottle. Every part You might not need it all, but we want to bring you down the pathway so you can see it.

So if you want to scale it or add on partners or bring in funding sources or use legal professional services, eventually all of those things are going to be those off-ramps on the superhighway.

And right now, I mean, this is only 3x retired business people putting together an AI platform basically as a side hobby.

I'm an archaeologist. The other guy, he's got all kinds of other businesses. And then one of the other ones, a Harvard-educated entrepreneur that's built everything from the kiosk that you see in a CVS drug to, we built the interface for Qualcomm, the 2NET Hub.

. love The Fitbit for Google. We were the first ever instance of Zoom. We built it into a telemedicine platform.

So, you know, what we're using right now is one of our products. So we're but right now we're we're just doing this with bootstraps.

We have investors already, a couple billionaires, actually, but they want to see a proof of concept. So we're just building the proof of concept.

You're not putting a lot of money into it now. But if we see some bites off of this first three months that we roll out, that's why I want to make sure we had the proper marketing tools in place and the ability to immediately just put 10x advertisement and SEO and other types of marketing strategies in place in one minute, in one instance.

We wanted to have somebody that could scale with us quickly because if a ROAS starts going from two to four.

Number All All right. We're going to put 2, 4, 8X into the system, into the pipeline. And we know that we don't know everything.

That's the good thing about seasoned entrepreneurs. And we don't want to know everything about every iteration of AI and marketing.

We want to just say, look, I want 3X from this and 4X from that and bring it to me.

And here's the money.

[@7:30](#) - **Melissa Ceden**o (EmberTribe)

Yeah.

[@7:31](#) - **Matt Weisensee** (wissenweb.com)

Okay. So what brought it to you a long way around that answering your question was, I saw a catchy, I think it was a social post, maybe on Instagram.

And we're going to use all those channels, by the way, because we're looking for creative young people that want to skip school.

It's the perfect climate right now to skip a four year degree and move right in to a business. I have a nephew that was our first beta tester.

He went to med school. And he's like, you know what, I'm going to start a specialty item company for wiener dogs.

[@8:09](#) - **Melissa Cedeno (EmberTribe)**

It's called Big Wiener Energy.

[@8:14](#) - **Matt Weisensee (wisenweb.com)**

Anyway, he's a smart kid. And he's like, I need to know about business, though. And I said, okay, just take it through the platform.

And so he just started. He's like, wow, I didn't know you had to do all this stuff. That's the point.

Great. So, so to get back to it, I saw something creative. I think you like manage social media advertising content strategy too.

[@8:38](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@8:39](#) - **Matt Weisensee (wisenweb.com)**

Okay. So, I mean, I know a lot about all the agencies, the Megas and the King Kongs, and I know about the Patel agencies and the, and I know, I mean, I've, I've used a lot of Sucre, friends of mine in California.

Very good. Very expensive. Pretty low cost for what you get, but it's also a little bit too hands-off for me.

We want to, you know, direct content strategy, and we want to, you know, create micro campaigns and macro branding campaigns and do all kinds of little things.

And if there's not enough, I think, touch and feel from a totally automated agency, and then the old school brick-and-mortar ones seem to be, you know, well, we do this and that, and we do it well and better than anyone, but we don't do that, because I don't think they understand parts of, you know, GEO and AEO and, you know, it's just so new to them.

Yeah. And, and so, and we, you know, we want to have a very broad approach, because we want to attract a million members, that's our goal.

And we want 100,000 within the first year, and we only want 1,000 paid customers for the proof of concept.

[@9:59](#) - **Melissa Cedeno (EmberTribe)**

Okay.

[@10:00](#) - **Matt Weisensee (wissenweb.com)**

So it's pretty easy, considering that everyone in the world with an idea is our prospect. Our market is gigantic, and one of the channels that we want to approach using the youth group strategy, which will be a separate or wholly owned subsidiary of Entra World, it'll be, we thought of a name called Entra Start.

And we also have the Piranha Pond, which is Entra Pool, which we have already got people lined up that want to be investors, we have a moderator, we have a famous podcaster, and we want to have everyone compete, but using AI to score them, not five, you know, people with big attitudes on a camera, but we're going to let that happen, too.

We're going to have, but it's going to be virtual on, on the internet, and the, and these piranhas in the pool are going to be a lot more of them with a smaller bite, but it's a much bigger figure.

So we're going to play on the Shark Tank, and we're going to have packages and partnerships and game sharing models built into the pond.

So that's another part of this whole entire Intra world. That's why it's called World. We started a company called Intra Health, and we are the pioneers of telemedicine.

[@11:24](#) - **Melissa Cedeno (EmberTribe)**

Okay.

[@11:25](#) - **Matt Weisensee (wissenweb.com)**

We integrated the first ever wireless device in the world. We were, you know, 20 years ahead of, you know, COVID, and we invented the Bluetooth glucometer and scale.

Have ever seen all the devices like they sell in the Best Buy now? Withing scale and blue blood pressure cuffs that are connected to your computer and your health.

Eye health, we invented all those.

[@11:51](#) - **Melissa Cedeno (EmberTribe)**

Wow, yeah.

[@11:52](#) - **Matt Weisensee (wisenweb.com)**

And, and, but we sold them to a pharmaceutical company that does clinical research so they could do virtual trials.

They didn't have to have. People come into a clinic, so their cohort was in their home, and we ship them a kit, the entry kit, and they would send back their information, biometric readings to their doctor and to the investigators in the trials, and we sold it too soon.

Then COVID hit, and telemedicine blew up. I had 350,000 shares of Zoom.

[@12:27](#) - **Melissa Cedeno (EmberTribe)**

Wow, wow.

[@12:29](#) - **Matt Weisensee (wisenweb.com)**

Yeah.

[@12:30](#) - **Melissa Cedeno (EmberTribe)**

What year did you sell it?

[@12:33](#) - **Matt Weisensee (wisenweb.com)**

The sixth, 17, 2000, 18, 18, right when they were just new. And all kinds of other apps that you see today, like we built the app called My Health Point, which became my chart for Epic.

[@12:47](#) - **Melissa Cedeno (EmberTribe)**

Yep.

[@12:48](#) - **Matt Weisensee (wisenweb.com)**

We designed Epic Orchard.

[@12:51](#) - **Melissa Cedeno (EmberTribe)**

Wow.

[@12:51](#) - **Matt Weisensee (wissenweb.com)**

I mean, lots of different things, but we were too early. We're always too early, and we think we're too early in this as well, but we're slow.

That's where we're. We're slowly doing it. All of the AI companies that are the flash in the pan right now, they're the pets.com's and the MySpace's, they're going to blow through in phase one and there's already like a hundred thousand AI companies that have come and gone.

I believe it. Because they do one little thing and they don't do it very well.

[@13:25](#) - **Melissa Cedeno (EmberTribe)**

And by the time they perfect it, they are obsolete because AI is changing so quickly.

[@13:31](#) - **Matt Weisensee (wissenweb.com)**

That's exactly right. So we're building, and I explained this to Larry, he's the owner and founder. I just wrote a book, so I told him, I'm going to use the platform to promote my book and I'm going to just put it into the etcher.

I'm going to create some new way for publishers to market, you can't see much yet in the website. It's just kind of very...

They, we're just trying to make it so, I mean, we're probably going to, this is the second version of the website.

The first one was one page. This one's a little bit more dynamic, but we wrote it in React. Yeah.

took us, it took us about a day.

[@14:15](#) - **Melissa Cedeno (EmberTribe)**

Yeah, yeah.

[@14:17](#) - **Matt Weisensee (wissenweb.com)**

And it's not, it's not optimized. We don't, we haven't plugged anything into it yet. We're in the, hey, look what we're building phase.

And we've got people like JT Fox is on our board.

[@14:33](#) - **Melissa Ceden**o (EmberTribe)

I don't know if you know him. I don't.

[@14:35](#) - **Matt Weisensee** (wisenweb.com)

He's like the next Tony Robbins.

[@14:37](#) - **Melissa Ceden**o (EmberTribe)

Okay.

[@14:38](#) - **Matt Weisensee** (wisenweb.com)

He's, you know, global celebrity. He's a billionaire. He has his own AI engine, which is integrated into our platform, by the way.

And he said, look, if the proof of concept works, I'm going to invest in it right now. You got to prove to me, you got to get, you got to get some sales.

Yeah. It's the oldest game. has And, I'm a sales guy by trade, archaeologist by degree, author by my love, but I don't know enough about every new nuance of SEO and search optimization versus just the old, I mean, the algorithms change so rapidly, and I know Meta and Google just announced yesterday a whole new approach.

And I've been playing around with Perplexity and their new Comet browser, and I mean, I'm just seeing the way that things are discovered now from a user's perspective, trying to apply that to a model which attracts more people, people with ideas.

And every day I have someone say, I need that program. It's not built completely yet. think we're about, I would say 75 to 80%, but it, but there's enough in it now.

So, for... The MVP, certainly. It's got built-in video conferencing. We built our own codec. We use the same structure that we built Zoom in, but we've got our own AI engine.

We have our own LLM. We have our own wizard to take you through business process. We have a social, not social, but business networking site.

It's more for collaboration and team building and sharing IP. It's secure and it doesn't have, it's not, it's not for posting videos of your cat.

It's about, hey, look at this idea. And we have a really basic note, have you, have you looked at the actual platform yet?

[@16:45](#) - **Melissa Ceden**o (EmberTribe)

Have you clicked on the join now and joined or? I did not do the join now. I did do.

[@16:50](#) - **Matt Weisensee (wisenweb.com)**

That's a whole different platform. EtcherWorld.ai is where the web tool, the web app is based. And we have a Google and an app.

We app as well, but they're not published on the store yet. We're probably going to go live in a week just to do some beta testing.

And then we're going to go marketing launch in probably April 7th because we have a presentation on the 8th.

And we're going to do some geofencing around the presentation. And we're going to just focus on this one client as a test for ourselves.

It's a really big whale and it's a long shot, but we have an inside track. I'll just reveal the name.

It's the most prestigious business school in the world. It's Babson College, but it's the sub-college of entrepreneurial AI college by Dean Metropolis.

[@17:51](#) - **Melissa Cedeno (EmberTribe)**

I don't know if you know any of those folks.

[@17:53](#) - **Matt Weisensee (wisenweb.com)**

I don't. Are you an Ivy League grad?

[@17:55](#) - **Melissa Cedeno (EmberTribe)**

I am not an Ivy. I went to UW-Madison, University of Wisconsin, so not Ivy League. But I do love everything that you're saying.

And entrepreneurship is near and dear to my heart. So apart from my agency life, funny thing is that we just bought a coffee shop, right?

Like a little local coffee shop here in Wilmington. And I've never, I've never made coffee outside of my house, like ever.

[@18:21](#) - **Matt Weisensee (wisenweb.com)**

Right.

[@18:22](#) - **Melissa Cedeno (EmberTribe)**

So we just found it and we put a low ball offer and they accepted it. And we're like, Oh my gosh, now we're going to own a coffee shop.

What do we do? And what do we do? Well, we went to AI and YouTube and said, we'll figure it out.

And so what I'm trying to teach my kids is nowadays, you don't have to be smart. You just have to be resourceful.

There's always going to be tools that you can literally figure out anything in the world. And so when it comes to what you were saying earlier about, Hey, you know, your, your nephew about having a medical and a law degree, like not everybody needs to go to college anymore.

No. No. You can become an entrepreneur with so many ideas and so many resources out there that it is really important to be able to find the right resources, which I think is what you guys are trying to, the gap that you're trying to meet in the market, right?

[@19:13](#) - **Matt Weisensee (wissenweb.com)**

Yeah, yeah. We're also trying to educate youth groups and students. So we've approached Babson that we want to become a virtual preparatory school for you.

We want to be a recruiting engine, but we also want to be a brand ambassador because we want to white label your content that's in your online university right now, your extended courses.

But dumb them down for junior high and high school students.

[@19:45](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@19:45](#) - **Matt Weisensee (wissenweb.com)**

To create, basically, a community of empowerment of, and give the platform to special needs groups, underserved communities. And just...

Show them that you can be a business owner too. You can become your own CEO. And we've got all kinds of ideas about marketing campaigns, but, you know, put down the cup of Starbucks and I'll tell you a story about my Starbucks background too, but, and my Got Milk background too.

But, so I've been in marketing and sales my whole life. I've started lots of businesses. My first business ever was a creative marketing agency when I was 16 years old.

And I ended up creating some brands and helping, um, a company called, um, Baskin Robbins, the ice cream company and, and other, other, other companies too.

But, um, I brought Guatemalan coffee from Guatemala while I was studying archeology in the, in the jungle to Starbucks in Seattle and Cafe Antigua.

sell in every coffee. tell you the story because you mentioned your coffee shop. Um, that's their number one seller in the world.

[@20:58](#) - **Melissa Cedeno (EmberTribe)**

No way.

[@21:00](#) - **Matt Weisensee (wisenweb.com)**

My friend owned the coffee shop, but he said, I don't know what to do. Should I open up a Tienda down the street?

I said, no, you want to go where the market is. People pay \$5 for coffee. The US, they pay a quarter here.

It's the same bean. Ship it. And then, won't that be expensive? No, actually not. The boats are already going and they want to fill them up.

So anyway, and that's the same thing with, you have an idea for your coffee shop, forget about selling it.

Only at your coffee shop. That's just the brick and mortar brochure. My friend, Dr. Bob Arnott, he owns Green Mountain Coffee up in Stowe, Vermont.

don't know if you know that we're familiar with it. No, they, they, they're, they're one of the biggest independent.

You've probably seen the little coffee pods that they, they, they sell.

[@21:53](#) - **Melissa Cedeno (EmberTribe)**

Is it green?

[@21:54](#) - **Matt Weisensee (wisenweb.com)**

Yeah.

[@21:55](#) - **Melissa Cedeno (EmberTribe)**

Yeah. Oh, Green Mountain.

[@21:57](#) - **Matt Weisensee (wisenweb.com)**

Let me see.

[@21:57](#) - **Melissa Cedeno (EmberTribe)**

Green Mountain. huge. They're, they're, they're, they're,

[@22:00](#) - **Matt Weisensee (wisenweb.com)**

Hundreds of millions in sales now, but Dr. Bob Arnott's the famous author of the TV, you know, the Dateline.

[@22:06](#) - **Melissa Cedeno (EmberTribe)**

Yes, yes, yes. Now that I see the, they have the Keurig pods and all that.

[@22:11](#) - **Matt Weisensee (wisenweb.com)**

Now that I see the logo. Yep, yep. Yeah, that was their business model. It wasn't selling Green Mountain in that little store in Stowe, Vermont, or the little, it's their friends with the Baskin-Robin, or the, excuse me, the Ben and Jerry's guys.

They're in the same little town.

[@22:26](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@22:27](#) - **Matt Weisensee (wisenweb.com)**

Yeah. And the idea is that you could take your coffee brand and make it a brand and sell specialty items from the brand.

You could sell coffee, you could sell coffee drinks, you could sell iced coffee, could, you could, you know, market it only to Costco, which are my fraternity brothers and friends from San Diego State started Costco.

So, I mean, connections and resources, like you said, you hit that spot on, by the way. That's, you know, Steve Jobs used to say, I don't want to be the smart.

This guy in the room, what good does that do me? I ever want to sit there and be my yes man.

I want people around me that help elevate me. So you could create an entire different business or five different businesses out of one concept of you have a really good coffee and you could spit it as a southern pecan flavor and they'd sell it only to the southeast.

You know advertise it in southern living or or have like my friends here in town just started a coffee shop.

And here's their niche. They're not just selling coffee. They're partnered with a company that makes an AI generated image on the top of your.

[@23:48](#) - **Melissa Cedeno (EmberTribe)**

Oh, yeah, I've seen them.

[@23:51](#) - **Matt Weisensee (wisenweb.com)**

Yeah, OK. And so so they're pushing their brand and they also have a brand where they sell franchises of these little miniature.

And coffee huts. So they sell the hut. It's like you can buy them on Amazon, but they customize them, put a coffee maker in a, and then they sell the whole hut for three grand.

Plus you have to pay the franchise fee and then you buy all the supplies. They give them a really, it's a lost leader.

It's cool. It's like a food truck.

[@24:24](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@24:25](#) - **Matt Weisensee (wisenweb.com)**

It's a coffee truck. Tow it behind, you can tow it behind a motorcycle.

[@24:28](#) - **Melissa Cedeno (EmberTribe)**

It's so light. Yeah. I've seen that.

[@24:31](#) - **Matt Weisensee (wisenweb.com)**

Okay. And so, so, and, and, and what they brew is ice coffee and, or, or you, what do you guys call it?

Cold brew.

[@24:40](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@24:40](#) - **Matt Weisensee (wisenweb.com)**

Cold brew, but they sell it to the bar industry to make espresso martinis. And then they have a machine that makes a topping with the logo of the company of the bar on and for the espresso martini and they foam it with it, with a logo.

So that's their business model. It's not, they're getting money from the manufacturer. The of the device, they're selling into the bars, they do sell coffee, but they only have three or four locations here in Louisiana, so I don't know if it's, Louisiana's a great place to test your franchise model, by the way, Baton Rouge is like the number one place in the country.

[@25:20](#) - **Melissa Cedeno (EmberTribe)**

Is it?

[@25:21](#) - **Matt Weisensee (wisenweb.com)**

Oh yeah, every franchise has one there, because it's a capital city, it's a college town, it's southern, but it's close to Texas, it's in two time zones, basically, I mean, like, it's a very odd place, and there's oilers, and if you ever want to franchise your business, try to open one there.

[@25:42](#) - **Melissa Cedeno (EmberTribe)**

That's interesting, because I know somebody who just sold 10 Popeye franchises in Louisiana.

[@25:48](#) - **Matt Weisensee (wisenweb.com)**

Yeah.

[@25:49](#) - **Melissa Cedeno (EmberTribe)**

Yeah, my neighbors. That's funny.

[@25:51](#) - **Matt Weisensee (wisenweb.com)**

They sold them, or they bought them?

[@25:54](#) - **Melissa Cedeno (EmberTribe)**

They sold them, she sold them.

[@25:56](#) - **Matt Weisensee (wisenweb.com)**

I think they over built, there's a bunch of them closing right now too. think they Perfect. They're competing with your Bojangles in North Carolina.

[@26:05](#) - **Melissa Cedeno (EmberTribe)**

Yep, exactly right.

[@26:06](#) - **Matt Weisensee (wisenweb.com)**

But like the company, you ever heard of Canes, Raising Canes?

[@26:11](#) - **Melissa Cedeno (EmberTribe)**

Yeah, they're everywhere now.

[@26:13](#) - **Matt Weisensee (wisenweb.com)**

Baton Rouge, know, walk-on sports bars, Twin Peaks, it's like the copy.

[@26:20](#) - **Melissa Cedeno (EmberTribe)**

Yeah, my husband loves Twin Peaks.

[@26:22](#) - **Matt Weisensee (wisenweb.com)**

I actually like it too, because they do have, really?

[@26:26](#) - **Melissa Ceden**o (EmberTribe)

Oh, let me tell you, we actually, we actually love it. It's like the modern Hooters, but you know. Yeah, the food's pretty good.

Their bacon is so good.

[@26:35](#) - **Matt Weisensee** (wissenweb.com)

Yeah, the sports bar is fun. The Bloody Marys are delicious. But I mean, the idea though is, you gotta find out where the market is.

[@26:43](#) - **Melissa Ceden**o (EmberTribe)

Yeah.

[@26:43](#) - **Matt Weisensee** (wissenweb.com)

And back to the Starbucks story. And, and, and, and I went back to visit 10 years later, my friend Manolo Farfan Contreras.

He's got, you ever see the movie Scarface, that mansion? That's what he lives in now.

[@26:58](#) - **Melissa Ceden**o (EmberTribe)

I love it.

[@26:59](#) - **Matt Weisensee** (wissenweb.com)

I Yeah.

[@26:59](#) - **Melissa Ceden**o (EmberTribe)

Yeah.

[@27:00](#) - **Matt Weisensee** (wissenweb.com)

Yeah. Yeah. Yeah. And this guy was like ready to give up, give up.

[@27:04](#) - **Melissa Cedeno (EmberTribe)**

I mean, it's, but anyway, all right. So tell me what you guys do and tell me if you can help us.

[@27:09](#) - **Matt Weisensee (wisenweb.com)**

Cause all we want to do is create conversions. We want to bring in as many freemium users as possible, convert 10 to 15% of them, bring in, you know, a hundred thousand paid users.

The company's worth \$50 million with 75,000 users.

[@27:28](#) - **Melissa Cedeno (EmberTribe)**

Okay.

[@27:30](#) - **Matt Weisensee (wisenweb.com)**

So back in, we have partnerships and gain sharing. Like I'll give you another, I'll just tell you one more thing about it.

It's not just business to consumer. We're also going to attract all of the people for the marketplace. We already have an insurance broker that wants to be the insurance provider for every new small business that comes through the system.

[@27:53](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@27:54](#) - **Matt Weisensee (wisenweb.com)**

of course.

[@27:54](#) - **Melissa Cedeno (EmberTribe)**

a, we have a patent attorney wants to be the patent attorney. You can also get a POS. Bye. That's, you know, like a POS partner, because that's going to be big for any.

[@28:05](#) - **Matt Weisensee (wisenweb.com)**

Yeah, we're in medical device manufacturing and we can build anything. And I already thought of that. POS, that's a good, I'm glad you're thinking the same terms.

So our own Stripe device or something that goes just free for the membership.

[@28:20](#) - **Melissa Ceden (EmberTribe)**

Yeah.

[@28:20](#) - **Matt Weisensee (wisenweb.com)**

We can build them for nothing. Yeah. It's the software.

[@28:23](#) - **Melissa Ceden (EmberTribe)**

Let me tell you, the POS makes such a huge difference because we have, we have Square and now we have Clover.

And it's such a pain to have to, like, fit within the realms of what they offer. And so having a POS, a great POS system is, is a huge deal.

[@28:40](#) - **Matt Weisensee (wisenweb.com)**

I built, okay. Oh, I was just going to tell you, I built something called the, it's called the fist bump.

It's a, it's a, it's a handshake key chain. And it also, you can, you can stick it on your window in your car and you can scan it between cars, or you can, you can, you can just fist bump people and exchange business information.

There's a bunch of them out there now that you've got to scan barcodes or hold up your phone to get near-field communication, but I just created a device that was like a dollar, and we're thinking about introducing that with a logo on it to get, you know, it's a digital business card.

Yeah, yeah, no, and that's really important.

[@29:19](#) - **Melissa Ceden (EmberTribe)**

I can tell you that as a business owner, I'm always, people are asking me for my business card more than I thought they would nowadays, but it's so much easier to just share my contact info and just, you know.

[@29:29](#) - **Matt Weisensee (wissenweb.com)**

Yeah, like the hard card. Yeah. How much time do you have? I forgot.

[@29:33](#) - **Melissa Cedeno (EmberTribe)**

It's okay. I have probably another 20 minutes.

[@29:36](#) - **Matt Weisensee (wissenweb.com)**

Okay.

[@29:36](#) - **Melissa Cedeno (EmberTribe)**

I'm in, I'm on the East Coast.

[@29:38](#) - **Matt Weisensee (wissenweb.com)**

Well, you're in Louisiana. think you can help us here?

[@29:41](#) - **Melissa Cedeno (EmberTribe)**

Yeah. So, so my question to you is, all right, so everything that you said is fine. We, we, because we specialize in SEO and paid ads and email marketing and organic social media, all of the things that are digital.

My question to you is though, what is, and I know you said you have a globe of 100,000 in the first year, and then.

don't know. 1,000 paid customers for proof of concept. So at your price point of what is it, \$9.99 for the first paying one?

[@30:08](#) - **Matt Weisensee (wissenweb.com)**

Yeah, it's free. It's freemium right now for the first 2,000. We've changed the number a few times, but it's just whatever.

[@30:15](#) - **Melissa Cedeno (EmberTribe)**

We're just going to let, we want as many freemium people on there.

[@30:18](#) - **Matt Weisensee (wissenweb.com)**

So we can, first of all, test the system. And then from there, we're going to charge nine bucks a month.

Yeah. And we have the family plan of, or, you know, the group of five, five for 20.

[@30:30](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@30:31](#) - **Matt Weisensee (wissenweb.com)**

Okay. So we want, but, but we want to sell it to schools, like, you know, enrollments, a dollar where we get everybody like, like, a managed service.

[@30:41](#) - **Melissa Cedeno (EmberTribe)**

Yeah. So actually my middle son goes to an outdoor micro school and part of their curriculum is entrepreneurship and investing.

So to your point, it's that same thing, right? They have to learn how to build a business, sell it, make a profit.

They also, when it comes to investing, they, I forgot what platform it is that they just got on. also on...

So. But they're learning about investing in the stock market and all of that. So all of these schools are starting to really catch on to, hey, you know what, the reality is, you no longer need, my son's school, I think he just told me that they're no longer learning social studies, or geography, it was something that was like a major subject that they're no longer going to teach.

And so I'm like, okay, what are they going to replace it? They're to teach you guys how to like balance checkbooks, like real world stuff, you know, that people actually need, but thank you.

Thank you. So when it comes to, I have a few questions to you. If you want to do paid ads, what's your marketing, what's your ad spend budget?

And then what's your overall marketing budget? So I can tell you what kind of strategy I would recommend within your budget.

[@31:42](#) - **Matt Weisensee (wissenweb.com)**

For the first three months, we're going to cap it at 15 grand a month total, 45, 50 grand with, without everything in it with licenses.

We want to put 50 grand into a three month strategy and see what we get out of it.

[@31:59](#) - **Melissa Cedeno (EmberTribe)**

Okay, so So when you say licenses, tell me more about what the budget would be on it, because 15k would include everything.

Now, apart from licenses, but in essence, any ad spend or just the marketing fees, minus taking away whatever other stuff that doesn't have to do with that.

[@32:17](#) - **Matt Weisensee (wissenweb.com)**

CRM platform licenses, creative licenses, distribution, social influencing, or just AI bot driven licenses. You know, the Zeely's and the amplifiers and those types of platforms.

They're all fairly inexpensive.

[@32:34](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@32:35](#) - **Matt Weisensee (wissenweb.com)**

But Mega, as an example, it wants three grand a month flat.

[@32:43](#) - **Melissa Cedeno (EmberTribe)**

For what?

[@32:45](#) - **Matt Weisensee (wissenweb.com)**

To manage all of their AI engines and build the content, post it. And then that's not including ad spend.

[@32:54](#) - **Melissa Cedeno (EmberTribe)**

Okay. And that includes that they would be running ads for you on that three grand?

[@32:59](#) - **Matt Weisensee (wissenweb.com)**

Yeah. No, no, No, no, no. They're just placing, scheduling, doing creative, doing SEO. And then probably five grand a month in ad spend to start.

And then a couple thousand dollars in consulting. We use all kinds of different platforms. Like right now, we're on high level.

We have Webinar Kit. We're using Sales Closer AI. We have a plan to use Amplify or Ampcast. We haven't pulled the trigger on Mega yet.

That's why we're talking here now, is trying to see if it's a good fit. Also, we've, we've looked at platforms like Thrive and Vendasta and the ones that Scorpion, they're, they're made for specific industries and, and, and they want.

bl what? Bye Thank Anywhere from \$1,000 to \$1,500 for their platform usage licenses, for repurposing, white labeling it, reselling it.

I mean, so you add it all up, plus my time.

[@34:13](#) - **Melissa Cedeno (EmberTribe)**

Of course.

[@34:14](#) - **Matt Weisensee (wissenweb.com)**

And I basically volunteer about 90% of my time because these are my friends, and I'm going to get equity in the company when we launch.

So I'm playing the long game here. Right now, the answer is \$15,000 a month for three months. And we want to see if we can get 1,000 paid customers.

[@34:32](#) - **Melissa Cedeno (EmberTribe)**

Okay. So here's what I recommend. I recommend a mixture of paid ads, and I would do a content play.

So top of funnel content, which is one of our specialties, which is called Cluster Magic. And what it is, is high publishing volume and velocity of articles on your site that are top of funnel, but high monthly search volume, low keyword difficulty.

Meaning. Meaning. Meaning. So it's things that people are Googling and asking for that we always say, give people what they want so later we can give them what they need, right?

Somebody may not know that there's an AI-powered business solution that exists, right? But they have questions on how do I build a business plan or how do I XYZ?

So we want to answer those questions with our content because then we bring them to the site, we answer the question that they're having because we have to match the intent.

But as part of that article, we start to also introduce what Entra World does, right? And so there's a call to action and we're able to capture them into our atmosphere by answering the initial question they had, but introducing them to what they actually need, which is the AI-powered solution.

[@35:46](#) - **Matt Weisensee (wisenweb.com)**

That's exactly what our strategy is.

[@35:48](#) - **Melissa Ceden0 (EmberTribe)**

So that's good. I'm glad you said that.

[@35:49](#) - **Matt Weisensee (wisenweb.com)**

Yeah. And we've got a business plan creator, course, but I mean, you can go into any AI, LLM and get.

Get. You sure can. But it's not structured.

[@36:04](#) - **Melissa Ceden0 (EmberTribe)**

And also, it requires you as the business owner or the founder or whoever to actually do the work of inputting it and refining it.

So the way that our ClusterMagic service works is that we do keyword research. We, let's say, do 200 keywords.

Each keyword will then match into an article title. Again, this is high search volume, low keyword difficulty, so low hanging fruit, answering questions that people have, your ICP.

So then, or it could be things like, hey, what are some ideas for, if it's a teacher or a school administrator, of how do I teach my class about entrepreneurship?

You know, things like that. And so we want to answer those questions. And it's a, let's say, 200 keyword research.

We get approval from our client, which would be you. You're like, yep, I like these keywords. I like these article titles.

Awesome. We take them back. We're on year four of doing this. We started this before even the Neil Patels.

We're trying to, we're trying to do something like this. to we right? And want You We take it back into our AI.

It writes all 200 articles. The articles are coming out good. I'm not going to lie to you. They're coming out good, but we still have an in-house editor who will go through all the articles, make sure that each article has the proper images with alt text.

has H1 formatting, H2 formatting. It has the FAQs, the schemas, the table of contents. It also does the internal linking for prior content and future content.

So all of the pages are going to be interlinked. It has external links and it has call to action.

So it's formulated in such a way where not only are the AI snippets capturing it, but so is Google.

And so as long as the articles are matching the intent, you can do 400 articles a month and there's not a problem.

Actually, one of our clients does that. It's an AI healthcare.

[@37:51](#) - **Matt Weisensee (wisenweb.com)**

We use something like that to build blogs. I mean, they're pretty accurate and they're just filler, but we... We a strategy where we want to bait, it's the go fish strategy, we bait them, hook them, and cook them, we take some of those low-hanging fruit, very specific types of subject matters, like how much does it cost to start a business, and where do I get funding, and where do I begin, general, what are the best AI tools to help me market?

[@38:28](#) - **Melissa Cedeno (EmberTribe)**

Yes.

[@38:29](#) - **Matt Weisensee (wisenweb.com)**

We write some articles, but we don't want to do that, we want to just create, here's the template, what we want you to follow, but we want you to enhance, and replicate, and accelerate.

[@38:43](#) - **Melissa Cedeno (EmberTribe)**

Yes.

[@38:44](#) - **Matt Weisensee (wisenweb.com)**

we just built, and so what you're saying seems like it'll work, but what we do is, we put some articles on the website, and then we have a click-through download, you know, content for the give, the give is, you get a top,

[@39:00](#) - **Melissa Cedeno (EmberTribe)**

The list of the top 10 AI prompts.

[@39:03](#) - **Matt Weisensee (wissenweb.com)**

Yeah, it's a lead magnet, yeah. Yeah, and then it goes, takes you to the platform, to a paywall survey to gather more information about them, in case we have to have a backlink to get them later, whatever.

We need to track them, and we want to make sure, that's why we started using, I mean, I've used every CRM there is.

I mean, HubSpot, and SharpSpring, and Act, and Dynamics, and Salesforce, and HighLevel. I mean, they're all pretty much do the same thing.

And some of them are a lot better than the others, and some of them have really simple interfaces that don't do much, and vice versa.

And what we're trying to figure out, based on the marketing company that we use, some of them come with their own CRM, but we don't want to leave all of our data on someone else's server.

And we want to have it just in and So we can, if we want to, and also do sub campaigns and things or break out local markets and have 50 instances of our, like high level, we could have 50 different sub clients.

[@40:14](#) - **Melissa Cedeno (EmberTribe)**

Yeah. Yeah. We just migrated from HubSpot to high level.

[@40:18](#) - **Matt Weisensee (wissenweb.com)**

Oh, okay. Okay. That's what we're using right now. And we have a Twilio number. Are you familiar with sales agent, sales closer agents?

It's basically a video bot. So I just built a script. In fact, I can show it to you, but it's an outbound and an inbound avatar, but it's a video.

It's the same technology they use to make like a Synthesia training video.

[@40:46](#) - **Melissa Cedeno (EmberTribe)**

Yeah. But it's live. Okay.

[@40:48](#) - **Matt Weisensee (wissenweb.com)**

And it interacts. It interacts instantly. And it's, it's very good.

[@40:53](#) - **Melissa Cedeno (EmberTribe)**

Will it book on calendar?

[@40:56](#) - **Matt Weisensee (wissenweb.com)**

Yeah. It's, it's, it's, well, it's, there's three ways to do it. You can. You it in inbound and outbound calling, you can put it in inbound, outbound email, you can put it on the website to be a greeter, or you can build it into the platform to be a support agent and upsell conversion agent.

So like, hey, can I help you fill out that form? And it has all the answers already, and it's a pretty woman, and you could be one of our avatars.

[@41:24](#) - **Melissa Cedeno (EmberTribe)**

No, that's not, that's not.

[@41:27](#) - **Matt Weisensee (wissenweb.com)**

But the point is that that's going to be a sales lead generator itself.

[@41:35](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@41:35](#) - **Matt Weisensee (wissenweb.com)**

But it's going to work within high level, and then we want to make sure that the agency that we're using that helps us with SEO is bringing in other forms of leads, not just through what we've got in this automated system.

We want to have, like the webinars, and we want to promote, have you ever heard a webinar kit?

[@41:58](#) - **Melissa Cedeno (EmberTribe)**

Yes, is that the one that... that... That will do the, it's, you can pretend you're doing a live webinar, but in essence, it's a prerecorded and it has chat functionality and all of that.

[@42:08](#) - **Matt Weisensee (wisenweb.com)**

Yes. And it has a, it has a bot answering the questions for you. We have that as well. And that integrates with high level and high level of them or they're, they're, they're like, I think some of the same investors.

So you can use it for your coffee department. And then we want to bring your coffee business into Entry World because every one of our clients, prospects, vendors, associates, colleagues, family members are all potential customers for us.

[@42:37](#) - **Melissa Cedeno (EmberTribe)**

Yeah, of course.

[@42:37](#) - **Matt Weisensee (wisenweb.com)**

Especially if it's free, you have no reason not to join. And then you can use the tools. And what we're going to do is spend our advertising dollars on our, our spotlighted customers.

So we might have a campaign about you. Like I started when, I mean, I was drinking coffee and I started this.

This business, and I didn't know, because you know when you're in business school, they don't teach you about basic sales, they just tell you all the conceptual, academic, you know, like getting out and knocking on doors and making cold calls is an entire different, yeah, yeah, and how to sell and how to market.

If you're a doctor or a lawyer, they don't tell you anything about business. Nope.

[@43:24](#) - **Melissa Cedeno (EmberTribe)**

I have to go get a license, I have to go get, you know, taxes, yeah, all of the things.

Yep.

[@43:30](#) - **Matt Weisensee (wisenweb.com)**

Yeah. So, so we're going to have modules, partners, avatars, and a roadmap you just follow and answer questions is just keep asking you.

And by the time you get done with the survey, then the bot takes it over, it processes it into a business plan, a pitch deck, a sales script, and then it creates a video and a logo, and shows you where you can get money, and where you can buy insurance.

And then you have a store right there. right there.

[@44:00](#) - **Melissa Cedeno (EmberTribe)**

And then you can just put it on the store. It's a business school in your pocket, in essence.

[@44:04](#) - **Matt Weisensee (wissenweb.com)**

Yeah, yeah.

[@44:05](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@44:06](#) - **Matt Weisensee (wissenweb.com)**

And it's a storefront, too. So we want it to sell to everybody that's in our system, internally and externally.

I mean, and then we want them to sell through our system. So someone says, I already use Shopify. We'll embed a Shopify API into the store where they can just import everything using our interface so they can control everything from one place and then go access all their other tools.

[@44:35](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@44:36](#) - **Matt Weisensee (wissenweb.com)**

That's, we're programmers. So, all right. So tell me, I know we used up all your time.

[@44:41](#) - **Melissa Cedeno (EmberTribe)**

It's good. No, you're good. You're good. It's very intriguing. I love learning. I love entrepreneurs.

[@44:46](#) - **Matt Weisensee (wissenweb.com)**

You know why? I come from a third world country. I lived in Miami, but I'm from Nicaragua and my husband's Cuban.

Part of Nicaragua. I speak Spanish and I've lived in Guatemala for two years.

[@44:56](#) - **Melissa Cedeno (EmberTribe)**

Oh, very good. Again. I was born in Managua. inucine So my dad actually, okay, and you speak Spanish very well.

That's good. My dad actually still lives in Managua. So I love here just a little tidbit. I love entrepreneurship because in Cuba, in Nicaragua, it's worth nothing.

Like the government takes everything. And so for me, I understand the value of having the freedom to build your own thing, work your own thing, and being able to produce for your family.

So I love it. love entrepreneurship. But the other play I would do for you, Matt, is I would do Reddit.

Are you familiar with the role that Reddit is playing with the LLMs right now?

[@45:40](#) - **Matt Weisensee (wisensee.com)**

Oh, yeah. In fact, I've had several discussions with them. Thank you for saying that. Reddit, you know, you have that, you know, brand, you know, what are the term they use?

It's the reputation aspect.

[@45:56](#) - **Melissa Cedeno (EmberTribe)**

Management, reputation management.

[@45:57](#) - **Matt Weisensee (wisensee.com)**

Management. But it's more than influencing. And it's, it's like, it's like these recommendations or referrals.

[@46:04](#) - **Melissa Cedeno (EmberTribe)**

Seeding?

[@46:05](#) - **Matt Weisensee (wisensee.com)**

They have, they have this, there's this really clever name for, but yeah, I, we're going to do, we're going to use Reddit, but it's super expensive.

[@46:13](#) - **Melissa Cedeno (EmberTribe)**

Well, we actually, so part of our AEO service of, hey, we need to move away from just SEO. Now it's an AEO, like we've got to be visible everywhere.

It's part of that is not just the cluster magic, those high publishing volume velocity articles that I told you about, but coupling that with a Reddit program.

What we do is, for lack of a better word, think of it as Reddit influencers, aged Reddit accounts that are legit accounts that are not just started today.

And be able to seed Reddit because Reddit is the data point for the LLMs between Google and OpenAI, the contracts that they've signed 60 million and \$70 million a year.

So that they can use Reddit as their data point. So what we do is we. We. We seed Reddit, we have our aged accounts go and leave comments on threads that already have a high AI visibility or high traffic already, so we do the research to see which ones are going to be the most relevant, then we'll leave comments, and then we'll also create new threads on subreddits and things like that that are going to be based on whatever it is that we're trying to promote.

And so that way, not only are you being shown in Reddit, but we're also seeding the LLMs and being able to use that to increase the AI visibility, it has worked remarkably well.

[@47:34](#) - **Matt Weisensee (wissenweb.com)**

I love it, and I had that discussion with them about this, and it's a conflict of interest for them really, but they know the money is so great that they had to do it.

Because their whole idea or concept for a Reddit is, we don't want people posting and selling stuff, we want real, you know, comments and deep thinking and advice.

But I said, yeah, in the fact that they're already, they're now They're reselling those, I get, they're like virtual bot, they're influencers.

[@48:05](#) - **Melissa Cedeno (EmberTribe)**

That's the best way to say it, they're real accounts, they're real people behind the accounts that have been aged, but they're selling them or they're leasing them.

[@48:13](#) - **Matt Weisensee (wissenweb.com)**

Yeah, yeah.

[@48:14](#) - **Melissa Cedeno (EmberTribe)**

And so you're able to create content with it that is going to seed the LLMs, right? So anyway, so that's what I would do, I would do paid I agree with you on that.

[@48:24](#) - **Matt Weisensee (wissenweb.com)**

And how about CTV, like Roku?

[@48:26](#) - **Melissa Cedeno (EmberTribe)**

Yeah, CTV. So if you want to do, I mean, I don't know that you would, it depends, you could do Polygon.

And so, I mean, you're doing it for this pitch that you're going to be doing, right? But then you can also do it specifically for other, like you can do Polygon on specific schools you want to go after.

[@48:42](#) - **Matt Weisensee (wissenweb.com)**

So that's how we want to approach it this way. Like we want to practice on a bunch of different techniques during the proof of concept.

And if we see that one of them is, you know, outperforming, we're going to redirect everything into that in the last month.

[@48:58](#) - **Melissa Cedeno (EmberTribe)**

Yeah.

[@48:59](#) - **Matt Weisensee (wissenweb.com)**

Because- At the end we're showing one slide to the investor. Look who we got out of this amount of money.

We're already broke even. And I mean, it's unheard of in any tech company. We're broke even at month three and if you extrapolate and project revenue in a \$9 a month model, I mean, let's face it, it's less than a gym membership.

[@49:27](#) - **Melissa Cedeno (EmberTribe)**

It's less than you're spending in coffee. No offense. No, no, no. That's true. And you ever, you ever thought of a coffee club, by the way?

You know, it's really funny. I just told my business partner that today.

[@49:38](#) - **Matt Weisensee (wisenweb.com)**

I said, we need to start a coffee membership. We met for some reason. If you ever want to, you know, and I'm not saying I know everything, but I got a lot of experience in business and you seem like you're very young.

[@49:52](#) - **Melissa Ceden (EmberTribe)**

I'm in my mid forties. I don't know if I'm that young.

[@49:54](#) - **Matt Weisensee (wisenweb.com)**

You look like you're 25.

[@49:55](#) - **Melissa Ceden (EmberTribe)**

I appreciate that. No, I'm in my You have a lucky husband. Hmm. I don't know if he knows he's lucky.

[@49:59](#) - **Matt Weisensee (wisenweb.com)**

I But I tell him all the time. Yeah, you should tell him. Remind him every day. I'm Han Solo, so...

You just go for it. It's my 60th birthday in two weeks. Really? Yeah, I'm getting nervous.

[@50:14](#) - **Melissa Ceden (EmberTribe)**

Well, Matt, you look great. I don't feel 60. You do not look 60. I would have taken you for maybe high 40s, like 49.

[@50:22](#) - **Matt Weisensee (wisenweb.com)**

I met a girl last night at a bar and she's like, how old are you anyway? I said, well, I'm younger than Brad Pitt.

[@50:28](#) - **Melissa Ceden (EmberTribe)**

She goes, that'll work for me. I know. It's crazy to think that Brad Pitt, what is he? How old is he now?

He's in the 60s.

[@50:36](#) - **Matt Weisensee (wissenweb.com)**

He's 63?

[@50:37](#) - **Melissa Cedeno (EmberTribe)**

Yeah, yeah. That's crazy. Like Brad Pitt, you know, in... What was that movie with the long hair? Tristan? I can't believe I forgot it.

[@50:47](#) - **Matt Weisensee (wissenweb.com)**

Oh my gosh. The long haired one?

[@50:49](#) - **Melissa Cedeno (EmberTribe)**

The river runs name was Tristan. No.

[@50:52](#) - **Matt Weisensee (wissenweb.com)**

The one...

[@50:53](#) - **Melissa Cedeno (EmberTribe)**

A Year in Tibet? No, the one that it's like... It's gonna...

[@50:59](#) - **Matt Weisensee (wissenweb.com)**

gonna... gonna... It's It's gonna...

[@51:00](#) - **Melissa Cedeno (EmberTribe)**

I can't remember. Now I have to call Brad Pitt, Tristan.

[@51:03](#) - **Matt Weisensee (wissenweb.com)**

My line worked.

[@51:05](#) - **Melissa Cedeno (EmberTribe)**

Legends of the Fall.

[@51:06](#) - **Matt Weisensee (wissenweb.com)**

Oh, that's the one, Legends of the Fall.

[@51:08](#) - **Melissa Cedeno (EmberTribe)**

My mom used to love that one. I know. It's crazy. But yeah, so Matt, that's what I would do.

I would do paid ads. I would do Cluster Magic, which is that content piece. Now your SEO, I wouldn't really focus too much on SEO right now, at least in these three months, because your SEO is going to be more of a long-term play.

Once you, SEO isn't going to deliver you leads at this moment.

[@51:33](#) - **Matt Weisensee (wissenweb.com)**

Yeah, we want to start it now, though, but not focus on it, because the longer we put it off, the longer it takes.

[@51:40](#) - **Melissa Cedeno (EmberTribe)**

Of because SEO is a long-term play. But I would do minimal SEO when it comes. I would do SEO for technical parts.

I would do it to ensure that your site is up and running, it has the correct meta titles, all of the technical, unsexy things.

Of course. I would do that to ensure your site is set up for success. And then I would do the content piece, which is the cluster.

All of the articles that are going to produce a lot of traffic to the site. Then I would do Reddit and I would do the CTV and Polygon because those are going to be the things that are going to give you those leads and that exposure.

I would also possibly consider LinkedIn.

[@52:16](#) - **Matt Weisensee (wissenweb.com)**

Yeah, we're considering that because I have 14,000 followers, so I can leverage that to 100,000 people, at least views every day if I keep posting something interesting.

[@52:27](#) - **Melissa Cedeno (EmberTribe)**

Exactly, so I think that that's what I would do. Now, when it comes to your site, I'm on your site now and I know I am of the mindset that done is better than perfect.

Like get things up there and get it going and then you iterate and you fix and you optimize, right?

But when it comes to the site, what plans do you have in terms of optimizing it or conversion rate optimization, things like that?

[@52:56](#) - **Matt Weisensee (wissenweb.com)**

Well, we were under the feeling that we've. If turn this over to an agency, they're going to blow the whole thing up and rebuild it the way they like it anyway, because it's so easy to do now.

[@53:07](#) - **Melissa Cedeno (EmberTribe)**

It's so easy.

[@53:09](#) - **Matt Weisensee (wissenweb.com)**

And build it in a structure that, you know, maybe not in React, maybe using WordPress or something. I mean, I've built them every way and no one really uses, it goes to websites anymore anyway.

It's just a conduit in between the social post and the actual registration.

[@53:28](#) - **Melissa Cedeno (EmberTribe)**

Yeah, I mean, you need them for landing pages, you need them for to run ads too.

[@53:32](#) - **Matt Weisensee (wissenweb.com)**

Yeah, the landing pages themselves are their own, and we'll have a different landing page every day, probably, because we have five personas.

We have the student, we have the young founder, we have the struggling business, like a professional that doesn't know anything about AI.

We have the partner, which is a business that wants to do work with our people. Or... .. And then we have the investor.

So those five people are gonna have five different landing pages and five different campaigns and 10 different messages every week for each one of those.

So that's 200 articles a month right there.

[@54:18](#) - **Melissa Cedeno (EmberTribe)**

Yeah, yeah, yeah. Because if you're gonna be targeting those ICPs, then you wanna talk to them in a specific manner.

[@54:26](#) - **Matt Weisensee (wissenweb.com)**

And you brought up something that's really important, many things, but this one's good. We're talking about Nicaragua. That in itself, because business is business, it's numbers and processes.

doesn't, the language doesn't matter. And we can, we've written this in a web app so we can translate it with the flick of a button.

And what we wanna do is have an entire department towards, emerging economies, Spanish speaking, I mean. One for Brazil and Portuguese.

Brazil itself's market is enormous. It's unbelievable. I went and spent a month there a couple months ago. And one of the guys at Babson, actually the president of Babson, Stephen, he's the chairman of Planet Fitness.

[@55:19](#) - **Melissa Cedeno (EmberTribe)**

And Planet Fitness, the founder, is a friend of mine here in Louisiana.

[@55:24](#) - **Matt Weisensee (wissenweb.com)**

And that was a business that was going under. I don't know if you knew that.

[@55:28](#) - **Melissa Cedeno (EmberTribe)**

No.

[@55:29](#) - **Matt Weisensee (wissenweb.com)**

Dean Metropolis put money in it, the dean of the, he happens to be named Dean too. Oh, that's funny.

He's the one who turned around Twinkies and turned around G.R. Deli Chocolate, Pabst Blue Ribbon Beer. His son owns the Playboy Mansion.

[@55:44](#) - **Melissa Cedeno (EmberTribe)**

Really?

[@55:45](#) - **Matt Weisensee (wissenweb.com)**

Yeah. Yeah.

[@55:46](#) - **Melissa Cedeno (EmberTribe)**

Paid a hundred million in cash for it.

[@55:48](#) - **Matt Weisensee (wissenweb.com)**

That's crazy. And this is his first target. I'm whale hunting here. This is not going after something small. Because Dean told the, one of my good friends and business partners.

He plays tennis with Dean, the country club guys in the ski resort in Stowe, Vermont.

[@56:06](#) - **Melissa Cedeno (EmberTribe)**

And so I got the inside ear.

[@56:08](#) - **Matt Weisensee (wissenweb.com)**

I knew exactly what he's thinking, what he's saying. He said, if our demo goes well with Babson, which he's the dean of, he might invest in it and expand it for every university.

And, you know, a virtual preparatory school. I know you've got two minutes. No, you're good.

[@56:26](#) - **Melissa Cedeno (EmberTribe)**

You're good. I think my husband's going to go pick up my preschooler.

[@56:29](#) - **Matt Weisensee (wisenweb.com)**

So I think you're good. Oh, OK. Oh, thank you, husband. All right. So if we can, if we get this first, not only the credibility to be associated with Babson, but the content that we're going to get.

And then we replicate this every country, every school, every student, every child in the world. Billion. There's a billion prospects.

[@56:55](#) - **Melissa Ceden0 (EmberTribe)**

But also like third world countries, you know, to the point of Brazil and Nicaragua. I'll go on Cuba, Cuba is a little harder right now, but you know, to those third world countries that people have dreams of wanting to build their own things, not, not, not a Cuba, but they don't have to come to America, they don't have to come to America, they can just go online and even think about, you know, there's all those programs in Africa where you support for \$10 and it goes to like a person building a business and whatever, right?

It's that kind of support that can also happen because if you translate it to their native language, now you're able to resource them.

And if there, it could be, I mean, this is down the line, but it could also be something where it's subsidized, right?

Like, hey, you buy one plan for me, for yourself, and you buy another plan for so and so in X country, and now you're doing good as well.

[@57:45](#) - **Matt Weisensee (wisenweb.com)**

Great idea. And in fact, if you read the website of Babson College, it's all about giving back. And, you know, it's a very liberal place.

[@57:56](#) - **Melissa Ceden0 (EmberTribe)**

I'm a political, but I'm more of a Republican.

[@58:00](#) - **Matt Weisensee (wisenweb.com)**

But the climate in this university is all about helping the underserved, and so I created a document, I already had the first presentation, and they asked for a demo now.

It's called Entra Start, and that alone, we've applied for a grant from the White House, because Melania Trump is in charge of AI for education.

Did you see that at the... I did not. I did not. Yeah, I'm sure it's ridiculous, but they're giving away money, and we're not stupid.

[@58:33](#) - **Melissa Cedeno (EmberTribe)**

My college roommate is business partners with Ivanka Trump.

[@58:37](#) - **Matt Weisensee (wissenweb.com)**

Oh, really? Well, you should send her an email. You got to get on board now.

[@58:43](#) - **Melissa Cedeno (EmberTribe)**

Yeah, yeah.

[@58:44](#) - **Matt Weisensee (wissenweb.com)**

So the point here is that we could just sell this as an educational program for junior highs, or sell it to the charter schools or to the private schools.

There's, like I said, we only need 100,000 people. Well, guys With a 25% attrition rate, keep upselling, and we have all kinds of other strategies, too.

We can give away specialty items, point of sale, devices, you know.

[@59:13](#) - **Melissa Cedeno (EmberTribe)**

I mean, it's one of those, that's one of the things that is, as a business owner, right, so we have Lavazza Coffee as our roaster, and so for one of the selling points was that if we went, if we bought their beans, they would supply us with a brand new espresso machine, a brand new grinder, and a brand new, like, commercial drip, you brewer, and we're like, okay, you know, Lavazza's great, it's good, and we're not having to pay \$20,000 for an espresso machine, you know.

[@59:40](#) - **Matt Weisensee (wissenweb.com)**

And you just buy the supplies from them.

[@59:42](#) - **Melissa Cedeno (EmberTribe)**

Which we would have to buy anyway.

[@59:43](#) - **Matt Weisensee (wisenweb.com)**

That's exactly right, that's exactly right, well, good for you, good luck, and I'll stop, where are you at, in Wilmington, I'll go to your coffee shop.

Right outside of Wilmington, in Hampstead, it's I'm gonna be, I'm gonna be in North Carolina in couple weeks, so I'm going to Cabo for

It's birthday, but then I'm going to North Carolina to visit my brothers.

[@1:00:03](#) - **Melissa Cedeno (EmberTribe)**

In Bali?

[@1:00:05](#) - **Matt Weisensee (wisenweb.com)**

Well, we usually go to the beach just to...

[@1:00:08](#) - **Melissa Cedeno (EmberTribe)**

Which beach?

[@1:00:09](#) - **Matt Weisensee (wisenweb.com)**

Well, we go to South Carolina usually to Myrtle or... But we always take it to drive up the coast and go to...

What's the one we like the best, where the Wright brothers flew their first...

[@1:00:26](#) - **Melissa Cedeno (EmberTribe)**

Riceville Beach?

[@1:00:28](#) - **Matt Weisensee (wisenweb.com)**

Not Wrightsville, but it's near there. It's near Wrightsville. Wrightsville, Carolina Beach, Surf City. Surf's with an A. An A?

It's one of those... But we always go to Wrightsville though. Do you know that bar there? It's... I have a t-shirt in my closet.

That total dive bar there on the beach in Wrightsville.

**ACTION ITEM: Draft 3-mo strategy/proposal for Matt: paid ads, ClusterMagic, Reddit, CTV (Polygon), LinkedIn; include HighLevel CRM plan; stay <\$45k - [WATCH](#)**

[@1:00:50](#) - **Melissa Cedeno (EmberTribe)**

I don't know. No.

[@1:00:51](#) - **Matt Weisensee (wissenweb.com)**

I mean, I'm not... I know you got to go. You're over your time.

[@1:00:56](#) - **Melissa Cedeno (EmberTribe)**

No, no. Thanks a lot.

[@1:00:57](#) - **Matt Weisensee (wissenweb.com)**

lot.

[@1:00:58](#) - **Melissa Cedeno (EmberTribe)**

You're good.

[@1:00:58](#) - **Matt Weisensee (wissenweb.com)**

Can you send me a...

[@1:00:59](#) - **Melissa Cedeno (EmberTribe)**

Can you Did me your proposal? Yes, but here's what I just want to confirm. So you're looking for, just let me recap it.

You're \$15,000 per month. However, it's not really \$15,000 because you still have to pay the CRM, the creative licenses and stuff like that.

So would it be safe to say that? Because I want to build you a strategy, but I want to make sure that I'm not going over budget and leave you space for the license.

[@1:01:21](#) - **Matt Weisensee (wissenweb.com)**

Within the, just frame it and break it down into the total amount for three months and make sure it doesn't exceed the \$45,000.

That's, that's the way to do it.

[@1:01:36](#) - **Melissa Cedeno (EmberTribe)**

But the \$45,000 still needs to leave room for your CRM.

[@1:01:40](#) - **Matt Weisensee (wissenweb.com)**

Well, there's some things that we've already paid for that are going to be between the \$45,000 and the \$50,000, like licenses and things, but it doesn't add up to \$5,000.

But anywhere, I don't want you to, you know, reverse engineer to make it fit. I want you to just put a strategy together that may work.

I give The amount exactly is not set in stone, but also we've got codes for people to do it for \$8,000 a month, but it's very basic.

It's SEO and some paid ads, \$3,000 a month, but we don't think we'll achieve the thousand paid users in three months, so we need to skip by them.

It's like we always throw the low ball and the high ball out and go to the median and see which one has the most value.

[@1:02:29](#) - **Melissa Cedeno (EmberTribe)**

So I like working with you already.

[@1:02:32](#) - **Matt Weisensee (wissenweb.com)**

If there's a way that we can, you know, scale to, we're not, there's no guarantees of this business, but I can tell you this.

If the proof of concept works and we have one customer that wants to go do gain sharing, they said, look, we'll do it for free for three months.

But we want, you know, 20% of your equity for the next five years. That's pretty ballsy, but, you know, we thought about it.

[@1:02:57](#) - **Melissa Cedeno (EmberTribe)**

It didn't go for it, Doug.

[@1:02:58](#) - **Matt Weisensee (wissenweb.com)**

But yeah, and then, and then. We have ones that are saying it's \$15,000 a month flat.

[@1:03:02](#) - **Melissa Cedeno (EmberTribe)**

It comes with everything.

[@1:03:03](#) - **Matt Weisensee (wissenweb.com)**

And then we have a lot of agency bids that are, we'll do this, but not the creative, or we'll do that, and not the CRM.

And it's like, that defeats the purpose.

[@1:03:13](#) - **Melissa Cedeno (EmberTribe)**

So do you want the CRM management as well?

[@1:03:15](#) - **Matt Weisensee (wissenweb.com)**

Is that what you're looking for? We want you to be users and maintain and leverage, but you don't have to pay the fee or anything.

No. I mean, we've already, we've already subscribed to high level.

[@1:03:33](#) - **Melissa Cedeno (EmberTribe)**

So when you say you want us to be users, tell me more about like what we assign you as a user and you'd go on and make sure that, you you'd run a report and you'd look at it.

Yeah. Because that's, that's helpful to know the quality of leads. So when we have to optimize the ads, it's helpful to know which leads are actually converting so that we can optimize the algorithms.

[@1:03:55](#) - **Matt Weisensee (wissenweb.com)**

Yeah. Do A-B testing and tweak them and, and focus on what works.

[@1:04:00](#) - **Melissa Cedeno (EmberTribe)**

Yeah, exactly. Okay. I just wanted to make sure that I understood what you said.

**ACTION ITEM: Call Matt 11:00 ET Mar 28; confirm via text; review strategy - [WATCH](#)**

[@1:04:04](#) - **Matt Weisensee (wisenweb.com)**

If you can email me that, because we really want to engage by next Monday.

[@1:04:12](#) - **Melissa Cedeno (EmberTribe)**

Okay. How about this? How about I put a strategy together and we take 30 minutes on Friday and we review it together?

[@1:04:19](#) - **Matt Weisensee (wisenweb.com)**

Perfect.

[@1:04:20](#) - **Melissa Cedeno (EmberTribe)**

What time was for you on Friday?

[@1:04:22](#) - **Matt Weisensee (wisenweb.com)**

Let me look at my calendar here.

[@1:04:25](#) - **Melissa Cedeno (EmberTribe)**

You're in Central Standard?

[@1:04:26](#) - **Matt Weisensee (wisenweb.com)**

in New Orleans now, but I'm leaving around, oh gosh, it'd have to be really early because I'm going to Shreveport at 10 a.m.

It'd have to be, you know, 8, 9, 9 o'clock your time or 10 o'clock your time. Let me see.

Friday's pretty open though, but I'm going to be on the road. We can talk on the phone anytime between noon and four.

You can just call me.

[@1:04:57](#) - **Melissa Cedeno (EmberTribe)**

I'll be in the car. Noon and four is going to be a little. It's bit harder for me because I already have stuff on my calendar.

[@1:05:03](#) - **Matt Weisensee (wissenweb.com)**

Or you can call me between 10 and noon then.

[@1:05:06](#) - **Melissa Cedeno (EmberTribe)**

Okay. about 10 and noon your time or 10 and noon my time?

[@1:05:10](#) - **Matt Weisensee (wissenweb.com)**

Anytime your time is fine. Anytime before noon is good for me.

[@1:05:15](#) - **Melissa Cedeno (EmberTribe)**

How about 11 a.m.

[@1:05:17](#) - **Matt Weisensee (wissenweb.com)**

Eastern? Perfect. That's fine.

[@1:05:20](#) - **Melissa Cedeno (EmberTribe)**

Okay. Do you want me to call you or do want me to set up a Zoom call?

[@1:05:25](#) - **Matt Weisensee (wissenweb.com)**

Just call me. 205-789-1900. You can text me first and say, I'm calling you now. And I'll tell you if I'm, you know.

[@1:05:34](#) - **Melissa Cedeno (EmberTribe)**

205-789-1900. 1900. Okay. I'm going to text you now so you can save my number. Because I know that sometimes, at least for me, it will not go to.

[@1:05:44](#) - **Matt Weisensee (wissenweb.com)**

Yeah. I have a very good spam blocker on my phone.

[@1:05:47](#) - **Melissa Cedeno (EmberTribe)**

Exactly. So I'll text you now. And let me just do that right now. So that you can ensure it doesn't go to spam.

Um, all right. Just sent you a text.

[@1:06:00](#) - **Matt Weisensee (wissenweb.com)**

Okay, my daughter just texted me her car won't start. She bought a brand new Mazda, too. She just got back from Hong Kong.

She represented the U.S. in the international moot court competition. They made it to the semifinals, 10 days in Hong Kong, paid for by some international organization.

Let's see. I got, hey. Hello. Okay. Melissa.

[@1:06:36](#) - **Melissa Cedeno (EmberTribe)**

Melissa, yep. At EmberTribe.

[@1:06:39](#) - **Matt Weisensee (wissenweb.com)**

Matt. I just put my name next to it too, so I know what it is.

[@1:06:42](#) - **Melissa Cedeno (EmberTribe)**

Okay.

[@1:06:44](#) - **Matt Weisensee (wissenweb.com)**

EmberTech.

[@1:06:45](#) - **Melissa Cedeno (EmberTribe)**

EmberTribe.

[@1:06:46](#) - **Matt Weisensee (wissenweb.com)**

Ember as in. EmberTribe.

[@1:06:48](#) - **Melissa Cedeno (EmberTribe)**

EmberTribe. EmberTribe.

[@1:06:49](#) - **Matt Weisensee (wissenweb.com)**

You gotcha. Okay. All right. I'll talk to you Friday.

[@1:06:53](#) - **Melissa Cedeno (EmberTribe)**

All right.

[@1:06:53](#) - **Matt Weisensee (wissenweb.com)**

I'll give you a call. Muchas gracias. All right.

[@1:06:56](#) - **Melissa Cedeno (EmberTribe)**

De nada, Matt. Adios. Bye. All right. you. Bye. Bye.
